evaluation of MMD Moyamoya syndrome are needed to help understand this complicated cerebrovascular disease and improve our treatment strategy. The goal of this Research Topic is to better understand the pathophysiological nature of MMD Moyamoya syndrome through objective neuroimaging. We also aim to generate a reasonable and objective evaluation system for MMD Moyamoya syndrome and would like to understand the link between cognitive impairment and brain damage of MMD Moyamoya syndrome through neuroimaging. Through these findings we also aim to improve the treatment strategy by understanding the pathophysiological link with relevant complications. Finally we also aim to improve our understanding of the significance of perioperative management for patients with severe complications from the perspective of objective evaluation.
