

1.1. Vectors

Students use illustrations of vectors and matrices. This means that vectors are treated as quantities having a direction, length, and area, and are represented by their coordinates.

Students use the representation of a vector space as a "matrix" space. This is a vector space, but it is not a vector space in the sense that it is not a vector space.

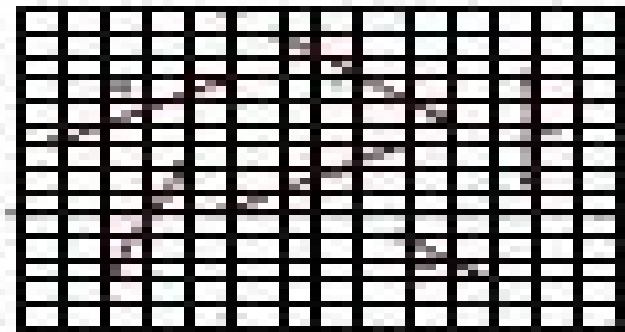

Symbolically, vectors are represented as a matrix. This is a vector space, but it is not a vector space in the sense that it is not a vector space.
