

Additional sets are worth extra armies in accordance with the table listed below:

Third set	8 armies
4th set	10 armies
5th set	12 armies
6th set	15 armies
7th set	20 armies
8th set	25 armies

Each additional set turned in increases the number of armies by five. Thus, the 12th set turned in is worth 45 armies. It should be particularly noted that the value of the sets of cards goes up each time a set is played, regardless of which player plays them. For example, if a player who has been unable to play a set of cards, turns in a combination after three sets have been turned in by other players, he/she is entitled to 10 armies. It is the total number of sets of cards that have been played, regardless of who plays them that determines the number of armies a player gets. It is advisable to make one player responsible for keeping a record on paper of the number of sets of cards turned in. Cards that are turned in are placed faceup alongside the draw pile to form a discard pile. If the draw pile is used up the cards in the discard pile are reshuffled and placed facedown to form a new draw pile.

Because one oblong piece is equivalent to 10 armies, it may be exchanged for 10 cubes (or vice versa) at any time during the game. These exchanges will be a convenience as larger numbers of armies come into play in the later stages of the game.

II. ELIMINATION OF OPPONENTS

One of the important plays of this game is the elimination of an opponent. A player, who on his/her turn is able to take from the board the last remaining piece of an opponent, receives at once all cards that the opponent has in his/her possession. He/she may combine them with the cards they already hold, and if they can make a set, they may turn it in immediately on that same turn to collect additional armies. If, as occasionally happens, he/she can make

two or three sets, they may also turn them in, receiving the regular increase for each set. This situation can arise only when the total of the cards that a player holds, when added to the cards of a player who they have eliminated, equals 6 or more. They must turn in enough sets to reduce the number of cards that they continue to hold to four or less. These new armies must be placed on the board in the usual manner. The player may then continue to play if they wish, or they may pass the dice to the next player.

SUMMARY OF PLAY

To facilitate play the following is a brief summary of what each player does on **every** turn throughout the game. The steps should be followed in order.

1. They determine how many armies they are entitled to by (a) counting up the **territories** (not armies) they occupy and dividing by 3; (b) checking to see if they are entitled to extra armies because they completely occupy any continent or continents; (c) checking their cards to see if they have a combination that they wish to turn in for additional armies.

2. They place these armies on the board on territories that they already occupy. This is the only time that a player may place armies during his/her turn except when he/she eliminates an opponent.

3. They make any attack they wish. They may attack as many times as they wish on a turn provided they have at least two armies on one of their own territories, which is adjacent to an opponent's territory.

4. They end their attack when they wish, or when they are forced to as a result of running out of armies.

5. They make their free move if they can and wish to.

6. They take **one** card if they have captured one or more territories on their turn.

7. They end their turn by passing the dice to the next player.
