Guided Reading

Postwar America

1. How does each of the authors describe the problems associated with postwar problems?

1. Problems: Millions of returning veterans and millions of people are finding themselves without jobs.

Solutions offered by the Truman administration and Congress	Congress passed the United States Housing Act, guaranteeing veterans a year's worth of unemployment benefits while job hunting. It offered unemployment benefits, guaranteed loans.
---	---

2. Problems: Severe housing shortage.

Solutions offered by developers such as William Levitt	Levitt used assembly-line techniques to build houses, offering homes to small residential communities called suburbs for less than \$17,500.
Solutions offered by the Truman and Eisenhower administrations	The Truman and Eisenhower administrations provided financial support for urban renewal and housing, working with the private business.

3. Problems: Severe inflation.

Solutions offered by the Truman administration and Congress	Congress passed Truman Administration recommended controls on the economy, including on prices, wages, and rents.
---	---

4. Problems: Labor unions that threaten to supply the nation.

Solutions offered by the Truman administration	Truman's administration said the nation's workers could not be put on strike to supply the jobs. He instructed the federal government to union that threat. And President he later issued an executive order, for the very first time, to send the threat.
--	--

5. Problems: Discrimination and racial violence.

Solutions offered by the Truman administration	The Truman administration passed an anti-lynching law, a fair employment practice commission, a government civil rights commission, integration of the armed forces, ordered that end to discrimination in the federal government employees.
--	--

6. Evaluate the significance of leaders in, Eisenhower, and Paul Dean.

Leaders	The leaders were asked to build some buildings, jobs, the jobs, collected a severe housing shortage.

US Foreign Policy and the Iranian Revolution C. Emery, 2013-10-15 This book provides a fresh perspective on the origins of the confrontation between the US and Iran It demonstrates that contrary to the claims of Iran s leaders there was no instinctive American hostility towards the Revolution and explains why many assumptions guiding US policy were inappropriate for dealing with the new reality in Iran

U.S. Army Intelligence in Germany, 1944-1949 Thomas Boghardt, 2023-11-06 The American military occupation of Germany lasted five years During this time Germany made great strides along the road from fascism to democracy Europe became the fulcrum of the Cold War and the United States emerged as a global superpower This book corrects numerous misunderstandings and fills many gaps in our knowledge about the occupation

194X Andrew Michael Shanken, 2009 During the Second World War American architecture was in a state of crisis The rationing of building materials and restrictions on nonmilitary construction continued the privations that the profession had endured during the Great Depression At the same time the dramatic events of the 1930s and 1940s led many architects to believe that their profession and society itself would undergo a profound shift once the war ended with private commissions giving way to centrally planned projects The magazine *Architectural Forum* coined the term 194X to encapsulate this wartime vision of postwar architecture and urbanism In a major study of American architecture during World War II Andrew M Shanken focuses on the culture of anticipation that arose in this period as out of work architects turned their energies from the built to the unbuilt redefining themselves as planners and creating original designs to excite the public about postwar architecture Shanken recasts the wartime era as a crucible for the intermingling of modernist architecture and consumer culture Challenging the pervasive idea that corporate capitalism corrupted the idealism of modernist architecture in the postwar era 194X shows instead that architecture s wartime partnership with corporate America was founded on shared anxieties and ideals Business and architecture were brought together in innovative ways as shown by Shanken s persuasive reading of magazine advertisements for Revere Copper and Brass U S Gypsum General Electric and other companies that prominently featured the work of leading progressive architects including Louis I Kahn Eero Saarinen and Walter Gropius Although the unexpected prosperity of the postwar era made the architecture of 194X obsolete before it could be built and led to its exclusion from the story of twentieth century American architecture Shanken makes clear that its anticipatory rhetoric and designs played a crucial role in the widespread acceptance

[The Bomb and America's Missile Age](#) Christopher Gainor, 2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver

thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force's USAF decision in March 1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major contribution to the history of rocket development and the nuclear age
