Complex Brain Functions Robert Miller, Alexey M Ivanitsky, 2000-05-30 There are many difficulties hindering western scientists from becoming acquainted with Russian scientific literature including both political and language barriers. Russian science has a long and proud tradition going back as far as Peter the Great and the founding of the Russian Academy of Science in 1725. However, Russian neuroscientists from the **Holt Science: Teacher's edition** Joseph Abruscato, 1989 **Electrical Review and Western Electrician**, 1911 **The Electrical Review**, 1928 **Macmillan Dictionary of Psychology** Stuart Sutherland, 1991-06-18 A dictionary which aims to cover all the technical terms that a psychologist is likely to encounter including terms from neurophysiology, neuroanatomy, neurobiology, neurochemistry, ethology, sociobiology, linguistics, artificial intelligence, sociology, anthropology, statistics, and philosophy. **The Macmillan Dictionary of Psychology** Stuart Sutherland, 1995-12-18 This completely revised edition incorporates over a 1000 new terms that have come into usage since the first edition was published in 1987. In addition, the definitions of many of the original terms have been revised and many new usages added. The dictionary includes as many terms as possible from other related disciplines including psychiatry, artificial intelligence, linguistics, statistics, neurology, neurophysiology, brain chemistry, genetics, etc. *The Electrical Journal*, 1885 **Drinking Behavior** J. Weijnen, 2012-12-06 This is the first book that is devoted entirely to a discussion of the effects on drinking behavior of sensory stimulation of the tongue and mouth. As Blass and Hall (1976) have recently pointed out, there has been an overrejection of the emphasis by Cannon (1932) and Hull (1943) on the peripheral origins, e.g., dry mouth, empty stomach, of the control of ingestive behavior. Thus, most present-day investigators of drinking behavior have been concentrating on central mechanisms of control to the neglect of the periphery. In this volume, we have attempted to bring together much of the pertinent peripheral literature through originally written chapters that are concerned with the role of orosensory factors in the mediation of drinking and licking. Post-ingestive effects of fluids receive little attention. Indeed, two chapters deal with consummatory licking in the absence of intake of fluids. A good understanding of the consequences of orosensory stimulation on licking and drinking behavior requires insight into the functional anatomy of the tongue and mouth, the characteristics of the licking response, and the problem of recording of licking behavior. Several chapters deal with these subjects. It has not only been a pleasure but also a privilege to edit this volume. We have learned much from the expert treatment of the different aspects of licking and drinking behavior by the chapter authors. **New**
