

Plant Hormones Chart

Hormone	Functions/Details
Auxins	• Found in leaves, developing shoots and seeds • Promotes cell elongation • Promotes cell expansion in response to light and gravity • Common auxin include indoleacetic acid, which is produced in the apical meristem, leaves, flower buds and other places where tissues multiply ◦ Apical dominance is caused by the auxins produced by the apical meristem. It causes the plant to grow vertically with little to no lateral/side growth. ◦ The removal of apical meristems reduces the number of auxins, thus resulting in side growth. • Low concentrations of auxins stimulate plant growth; high concentrations of auxins inhibit growth • The effect of auxins depends on the concentration and location
Cytokinins	• Responsible for cell division and differentiation ◦ Cytokinins stimulate the production of proteins that trigger mitosis and cytokinesis • Found in the root tips • Functions include ◦ Cell division and elongation ◦ Prevents the aging of leaves and fruits • The presence of other plant hormones can affect the effect of cytokinins. For example, IAA combined with cytokinins caused rapid cell division, which leads to rapid growth
Gibberellins	• Responsible for germination and cell elongation • Gibberellins can be applied to young plants, which increases stem length and the size of the fruit • Gibberellins increase the cluster size of grapes • Gibberellins stimulate plant growth by ◦ Changing the plant's cell walls ◦ Stopping seed dormancy ◦ Reversing generic dwarfism • Are transported in the vascular tissue • Created in the apical meristem • Gibberellins increase as the temperature gets warmer and closer to ideal growing conditions
Ethylene	• Only gaseous hormone • Promotes the ripening of fruit by weakening the cell walls and converting complex carbohydrates (ex. starch) into simple carbohydrates (ex. the monosaccharides glucose and fructose) • Found all over the plant, especially in areas undergoing stress, aging and ripening • Can diffuse between the spaces of cells • Can be transported in the phloem
Abscissic Acid	• Synthesized in mature green leaves, fruits, and root caps • Functions include: ◦ Inducing and prolonging seed dormancy ◦ Impeding shoot growth ◦ Preventing the impact of stimulatory hormones • When water is available, ABA levels drop, ending seed dormancy and starting germination

Plant Hormones Study Guide Answers Section 31: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year.

The Must-Read : Colleen Hoover "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed.

Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Plant Hormones Study Guide Answers Section 31 : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting.

These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
