Bauman, Tsvi Kahana, 2006-07-31 Unlike most works in constitutional theory which focus on the role of the courts this book addresses the role of legislatures in a regime of constitutional democracy Bringing together some of the world's leading constitutional scholars and political scientists the book addresses legislatures in democratic theory legislating and deliberating in the constitutional state constitution making

by legislatures legislative and popular constitutionalism and the dialogic role of legislatures both domestically with other institutions and internationally with other legislatures The book offers theoretical perspectives as well as case studies of several types of legislation from the United States and Canada It also addresses the role of legislatures both under the Westminster model and under a separation of powers system *Designing Democracy* Cass R. Sunstein, 2001-09-27 In modern nations political disagreement is the source of both the gravest danger and the greatest security writes Cass Sunstein All democracies face intense political conflict But is this conflict necessarily something to fear In this provocative book one of our leading political and legal theorists reveals how a nation's divisions of conviction and belief can be used to safeguard democracy Confronting one explosive political issue after another from presidential impeachment to the limits of religious liberty from discrimination against women and gays to the role of the judiciary Sunstein constructs a powerful new perspective from which to show how democracies negotiate their most divisive real world problems He focuses on a series of concrete concerns that go to the heart of the relationship between the idea of democracy and the idea of constitutionalism Illustrating his discussion with examples from constitutional debates and court cases in South Africa Eastern Europe Israel America and elsewhere Sunstein takes readers through a number of highly charged questions When should government be permitted to control discriminatory behavior by or within religious organizations Does it make sense to govern on the basis of popular referenda Can the right to have an abortion be defended Can we defend Internet regulation Should the law step in if children are being schooled in discriminatory preferences and beliefs Should a constitution protect rights to food shelter and health care Disputes over questions such as these can be fierce enough to pose a grave threat But in a paradox whose elaboration forms the core of Sunstein's book it is a nation's apparently threatening diversity of opinion that can ensure its integrity Extending his important recent work on the way deliberation within like minded groups can produce extremism Sunstein breaks new ground in identifying the mechanisms behind political conflict in democratic nations At the same time he develops a profound understanding of a constitutional democracy's system of checks and balances Sunstein shows how a good constitution fostering a republic of reasons enables people of opposing ethical and religious commitments to reach agreement where agreement is necessary while making it unnecessary to reach agreement when agreement is impossible A marvel of lucid subtle reasoning *DESIGNING DEMOCRACY* makes invaluable reading for anyone concerned with the promises and pitfalls of the democratic experiment *Organisation Studies and Human Resource Management* Kate Black, Russell Warhurst, 2021-11-10 This book advances educational understanding and practice in Organisation Studies and Human Resource Management OSHRM It develops new theoretical perspectives on learning in OSHRM and introduces and evaluates a range of educational approaches methods and techniques to advance teaching and assessment and student learning in the field Chapters are evidence based and provide practical advice for enhancing the effectiveness of OSHRM programmes and courses in universities colleges and human resource development settings globally With contributions from
