David L. Hough, 2009-09-01 *Middle Grades Research Exemplary Studies Linking Theory to Practice* is the first and only book to present what is perhaps the most thoroughly scrutinized group of studies focusing on middle grades education issues ever assembled. Each research project undertaken by the contributing authors herein resulted in the publication of a scholarly paper. As a collection, the ten studies featured in this book are the *crème de la crème* of submissions to the *Middle Grades Research Journal* between August 2006 and December 2008. They are the ten highest peer-reviewed manuscripts examined by members of the MGRJ Review Board, each having undergone careful blinded examination by three or more experts in the sub-specialty area addressed by the research study conducted. In addition, each study serves to exemplify how sound practical research findings can be linked to classroom practice in middle grades classrooms. *Middle Grades Research Exemplary Studies Linking Theory to Practice* is a must-read for university professors and a useful tool for middle grades educators across all subject areas and school settings. Professors who teach middle grades courses at both the undergraduate and graduate levels will find the book to be a superb supplemental accelerated readings text. Every college-level middle grades education course should make this book an integral part of class discussions. The book is also an excellent professional development study group resource for middle grades principals and classroom teachers across all subject areas. School-level Professional Learning Communities (PLCs) will find that Dr. Hough's book stimulates scholarly thought, promotes discussion, and demonstrates how educational theory can and should impact teaching and learning.

Curriculum Practice in the Elementary and Middle School J. Allen Queen, 1999 This first edition book offers very current treatment of curriculum issues, instructional planning, and new curriculum standards. The book integrates elements of the major historical, philosophical, and social influences upon past curriculum development. It compares traditional and futurist philosophies and describes the developmental aspects of children and their changing needs and interests within a framework of instructional expectations at specific grade levels. It also teaches the skills of curriculum development and instructional design. While a balanced coverage of viewpoints has been attempted, the book is intended to open new avenues by including educational futurism in a curricular model. It contains key chapter concepts, focus questions, a futurist curriculum model, actual units of instruction, and exercises for the reader to try. For educators at the elementary and middle school levels.
