Ahluwalia,2017-05-09 Environmental chemistry is becoming increasingly crucial in understanding important issues that range from climate change to local pollution problems It is the study of the chemical and biochemical phenomena that occur in the environment It also studies the effects of these chemicals on ecosystems animals and human health Advanced Environmental Chemistry discusses environment and its biological cycles The book provides students and professionals with a clear understanding of the science and its applications It provides an in depth introduction to the chemical composition of the atmosphere and water The author also thoroughly explores important concepts such as soil pollution radioactive pollution and environment toxicology All the chapters are followed by multiple choice and short answer questions Astrobiology: Future Perspectives P. Ehrenfreund,2004-07-14 Astrobiology a new exciting interdisciplinary research field seeks to unravel the origin and evolution of life wherever it might exist in the Universe The current view of the origin of life on Earth is that it is strongly connected to the origin and evolution of our planet and indeed of the Universe as a whole We are fortunate to be living in an era where centuries of speculation about the two ancient and fundamental problems the origin of life and its prevalence in the Universe are being replaced by experimental science The subject of Astrobiology can be approached from many different perspectives This book is focused on abiogenic organic matter from the viewpoint of astronomy and planetary science and considers its potential relevance to the origins of life on Earth and elsewhere Guided by the review papers in this book the concluding chapter aims to identify key questions to motivate future research and stimulate astrobiological applications of current and future research facilities and space missions Today s rich array of new spacecraft telescopes and dedicated scientists promises a steady flow of discoveries and insights that will ultimately lead us to the answers we seek

Human Characteristics Preben Bertelsen, Henrik Høgh-Olesen, Jan Tønnesvang, 2009-01-23 Every once in a while we have to reconsider the perennial questions concerning human nature What are the special human behaviours social practices and psychological structures that make us particularly human The field of evolution psychology and cognitive science is the most expanding inter disciplinary area of this field for the time being uniting different sciences under the same evolutionary paradigm and keeping them occupied by the same eternal questions stated above Relevant data and theoretical considerations are piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind was held at Aarhus University Denmark The studies fall into three well defined sections 1 Evolution and Cognition Comparative and Developmental Perspectives 2 Human Sociality Morality and Religiosity 3 Human Sexuality and Mating Strategies Specifying the differences between our own species and the rest of the animal world always provokes debate But these demarcations simply have to be drawn once and again They focus attention and stimulate research exactly because they provoke and challenge other researchers to take up the glove and prove us wrong **Target NTSE Class 10**
