competition law in New Zealand began with the Commerce Act 1986. Since then a steady and impressive corpus of case law had traversed all the usual major areas of antitrust law: cartels, resale price maintenance, exclusive dealing, tying, group boycotts, monopolization, mergers and acquisitions, exempted sectors and the role of economic evidence. This volume explains the rationale for the various major reforms, the ongoing contestation between the Harvard and Chicago Schools of antitrust and traces the developments of key concepts over the last 34 years. This title also explores systemic issues such as how well has New Zealand moulded its own competition law whilst nonetheless selectively drawing upon the policies, case law and wisdom of foreign jurisdictions; how effectively has it faced the challenge of adapting its fledgling competition law to the reality of being a small deregulated open and distant economy; and how successful was the application of competition law to utilities in the experimental era of light handed regulation. Written by a New Zealand competition expert, this detailed original and comprehensive chronicle of New Zealand's competition law and policy draws together the common threads that mark the modern era and offers some predictions about how the next decades of New Zealand competition law might unfold.

*International Merger Policy* Julie Clarke, 2014-04-25. *International Merger Policy* offers a compelling comparative assessment of domestic and regional merger laws and procedures. **Competition Policy for Small Market Economies** Michal S. Gal, Michal S. Gal, 2009-06-30. Michal Gal's thorough analysis shows the effects of market size on competition policy, ranging from rules of thumb to more general policy prescriptions such as goals and remedial tools. Competition policy in small economies is becoming increasingly important since the number of small jurisdictions adopting such policy is rapidly growing. Gal's focus extends beyond domestic competition policy to the evaluation of the current trend toward the worldwide harmonization of policies.

Competition Law Richard Whish, David Bailey, 2012-01-12. The authors describe the potential scope and application of the various legal provisions which regulate competition in the UK. This book also examines the results of the convergence of UK and EC law with regard to competition in business.

**Global Merger Control Manual** David J. Laing, Luis A. Gómez, 2007. The Oxford Handbook of International Antitrust Economics Roger D. Blair, D. Daniel Sokol, 2015. The Handbook examines the most important issues that arise in antitrust economics. Leading scholars in the field provide detailed critical analysis of developments across a number of different antitrust topics along with a detailed review of the literature. The Handbook is invaluable as a research and teaching tool.

**Proof of Antitrust Markets in Australia** Caron Beaton-Wells, 2003. This book examines the evidence involved in proving the existence of an antitrust market under the Australian Trade Practices Act 1974. An antitrust market is a complex economic/legal concept. Proof of such a market is a critical issue that must be tackled in assessing whether business conduct is anti-competitive for the purposes of the Act. It is an issue that arises in most jurisdictions in which competition legislation exists, including New Zealand, the United States and the European Community. *Proof of Antitrust Markets in Australia* is the first comprehensive

analysis of the evidentiary dimensions of this important issue. It provides significant practical insights for lawyers, economists, judges, regulators and business people concerning the evidence required to establish antitrust markets to the satisfaction of the courts. The challenges involved in presenting evidence from industry, consumers, statistical studies and expert witnesses are each explored in detail. The insights conveyed in the book indicate that while the approach taken by Australian courts to the evidence on this issue may be correct in principle, it lacks rigour in practice. The author makes a range of recommendations as to how the approach could be improved. This particular aspect of the book should be of interest to scholars in the field of competition law generally.
