

Newton's First Law

Imagine that you're riding in a car and the driver suddenly puts on the brakes. The car stops, but your body seems to keep going! You slide forward in your seat... until your seatbelt catches you and holds you back. You've just experienced Newton's First Law of Motion.

Newton's First Law of Motion is this:

- **An object at rest tends to stay at rest, and an object in motion tends to stay in motion, unless acted upon by an outside force.**

Newton's law has two parts. The first part says that if an object is "at rest," or still, it will continue to be still unless something moves it. If your car is parked in the driveway, it will stay right there until someone, or something, comes along and starts it or pushes it.

But what about objects that are moving? According to Newton's First Law, a moving object stays in motion in a straight line and at a steady speed. Think about sitting in that moving car again. Your body is in motion at the same speed as the car. The car has brakes to slow it down, but your body wants to stay in motion at the same, steady speed. That's why you slide forward in your seat, and that's why seatbelts are so important!

Outside forces, like air resistance and friction, slow things down and make them stop. Sometimes a moving object bumps into another object, and the impact makes it stop or change direction. If it weren't for these outside forces, then objects actually would stay in motion forever! Fill in the missing words to complete the sentences about Newton's First Law of Motion. Then, copy the boxed letters on the lines below to solve the puzzle.

- One example of an outside force that slows down moving objects is _____.
- Newton's law says that an object in motion will stay in _____.
- Newton said that a moving object will travel at a steady _____.
- Objects stay at rest or in motion until an outside _____ interferes.
- When an object is not moving, it is at _____.
- A moving object will go in a _____ line.
- Isaac Newton described how objects behave with his _____ of motion.

Another name for Newton's First Law of Motion is:

The law of _____.
