Long respected as a manufacturer of sturdy agricultural machinery the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon Wisconsin. Starting with a lawn and garden tractor in 1963 Deere soon entered the fast growing snowmobile market introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather dependent market. This detailed history written by two key participants in the snowmobile program describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front engine and water cooled models; the process of selecting engines and negotiating with suppliers; including when problems developed and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth and of the people and processes that made it all happen **Advanced Materials & Processes**, 2001 Popular Mechanics, 1993-06 Popular Mechanics inspires, instructs and influences readers to help them master the modern world.
