Politique Agricole Commune Conditionnalité Environnementale:

Le tournant environnemental de la politique agricole commune Matthieu Ansaloni, 2015-04-01 Après avoir retracé l'évolution de la définition des mesures agro environnementales l'auteur compare les politiques agro environnementales menées dans différents pays d'Europe. L'analyse suggérée repose sur une vaste enquête empirique conjuguant les méthodes sociologiques et ethnographiques. Cet ouvrage propose une lecture originale d'une politique européenne et considère ses changements aux échelles européenne nationale et régionale et les analyse à travers l'examen des débats publics qui les ont générés.

The Agricultural Law of the EU René Barents, 2022-05-13 European Monographs Series Volume 9 This second and much revised edition of the pre-eminent work on European Union EU agricultural law emphasises the sweeping changes that have led to the gradual expansion of the common agricultural policy to encompass the food chain as a whole. Although the new edition's purpose and methodology remain the same the author presents a completely new overview of the field as it now exists including the effects of the latest reform measures up to 2021 and their implications for the future. Imparting in depth awareness of the multifunctional character of agriculture today its importance for environmental protection preservation of biodiversity public health mitigation of climate change and rural development as well as its international obligations the book provides matchless insight and clarifications on such critical legal details as the following analysis of the Green Deal the Farm to Fork Strategy and the Biodiversity Strategy for 2030 extensive treatment of the TFEU provisions on agriculture and the impact of international legal instruments clear and easily accessible treatment of the legislation on market and price policy competition and the agri food chain thorough analysis of administrative law aspects in particular the rights and obligations of operators in the framework of numerous subsidy arrangements and related topics such as sanctions and force majeure and in depth treatment of the importance of the general principles of EU law for legal protection. Given that about one third of the EU's budget is spent on agriculture and that European legislation on agriculture is voluminous and complicated and case law is abundant this well organised and lucid exposition will be of immeasurable value to any practitioner asked to deal with a case involving agriculture anywhere in the EU. Academics aware of the growing intricacy of the field will welcome the author's reflections on the meaning and significance of EU agricultural law.

Traité de droit européen de l'environnement Patrick Thieffry, 2015-11-10 Le présent ouvrage est la 3^e édition du Traité de droit de l'environnement de l'Union européenne qui explicite et approfondit pour les besoins des professionnels et des chercheurs la synthèse publiée en 2014 dans le Manuel du même nom également au sein de la collection Droit de l'Union européenne. Ce double niveau d'approche est particulièrement justifié par le fait qu'une œuvre monumentale de près de cinquante années fragmente le complexe et volutive du fait tant des phénomènes environnementaux que de contraintes constitutionnelles politiques et économiques. Le Droit de l'environnement de l'Union n'en commande pas moins dans une très large mesure les législations nationales des vingt-huit États membres. Quelques semaines de la Conférence de Paris sur le climat cette 3^e édition dresse un état

des lieux des formes législatives intervenues toujours significatives depuis le traité de Lisbonne et le plan d'action climat et peut être surtout d'une jurisprudence particulièrement nourrie et qui manifeste une appropriation de la matière aussi bien par les juridictions nationales que par la Cour de justice et le Tribunal de l'Union. Le droit européen de l'environnement reste profondément marqué par des sources d'inspiration libre changeantes en dépit des progrès de la politique commune de l'environnement et de la montée en puissance de la politique de l'énergie et du principe d'intégration. Gouvernance et management environnementaux s'inscrivent dans un cadre complexe au sein duquel une conciliation doit s'opérer entre objectifs économiques et environnementaux autour de concepts tels que la recherche d'un niveau élevé de protection respectueux de la proportionnalité de l'égalité et du développement durable. Un rappel de ce cadre permet une présentation synthétique et dynamique des centaines de mesures qui fournissent les paramètres environnementaux de l'activité humaine des grands domaines de l'environnement aux objets ayant un impact sur celui-ci. Le succès des instruments économiques est confirmé par le caractère incontournable des marchés de droit de mission de gaz à effet de serre ou de la responsabilité élargie du producteur la fin de vie de ses produits plus que par l'écofiscalité. Quant à l'intégration des exigences de la protection de l'environnement dans les autres politiques elle régule les tensions insévitables avec les règles du marché la politique agricole commune ou la santé humaine. La politique de l'énergie instituée par le traité de Lisbonne doit quant à elle encore tester les frontières de son domaine d'intervention avec celui de la politique de l'environnement.

Examens environnementaux de l'OCDE : France 2016 OECD, 2016-07-11 Ce rapport est le troisième examen environnemental de la France. Il value ses progrès en matière de développement durable et de croissance verte avec un accent particulier sur la transition énergétique et la biodiversité.

Examens environnementaux de l'OCDE : Pays-Bas 2015 OECD, 2016-05-06 Ce rapport est le troisième examen environnemental des Pays-Bas. Il value les progrès accomplis par les Pays-Bas en termes de développement durable et de croissance verte avec un accent particulier sur la mobilité durable et la gestion des déchets et des matières.

Facing Hydrometeorological Extreme Events Isabelle La Jeunesse, Corinne Larrue, 2019-11-04 Provides an understanding of the relationship between social ecological systems and multilevel governance so that readers can properly deal with hydrometeorological extreme events and hazards. Based on field investigations from EU research projects this book is the first to devote itself to scientific and policy related knowledge concerning climate change induced extreme events. It depicts national and international strategies as well as tools used to improve multilevel governance for the management of hydrometeorological risks. It also demonstrates how these strategies play out over different scales of the decision making processes. Facing Hydrometeorological Extreme Events: A Governance Issue offers comprehensive coverage of such events as floods droughts coastal storms and wind storms. It showcases real life success stories of multilevel governance and highlights the individuals involved and the resources mobilized in the decision making processes. The book starts by presenting a synthesis of hydrometeorological extreme events and their impacts on society. It then demonstrates how societies are

organizing themselves to face these extreme events focusing on the strategies of integration of risk management in governance and public policy In addition it includes the results of several EU funded projects such as CLIMB STARFLOOD and INTERREG IVB project DROP The first book dedicated to hydrometeorological extreme events governance based on field investigations from EU research projects Offers a multi hazards approach mixing policy governance and field investigations main outputs Features the results of EU funded projects addressing hydrometeorological extreme events Part of the Hydrometeorological Extreme Events series Facing Hydrometeorological Extreme Events is an ideal book for upper graduate students postgraduates researchers scientists and policy makers working in the field

Conservation de la biodiversité et politique agricole commune de l'Union européenne Isabelle Doussan, Jérôme Dubois, 2007 Sur un territoire européen en et français model depuis des siècles par l'activité agricole les cadres politiques juridiques et économiques régissant l'agriculture voient aujourd'hui très rapidement changer la place de la nature dans une activité en plein bouleversement nous est apparu un enjeu de recherche fondamentale Progressivement la question agricole a délaissé le monde clos des producteurs et des administrations pour devenir un débat de société Toutes les contributions de cet ouvrage le montrent l'enjeu n'est plus tant de nourrir la population européenne que de trouver des compromis sociaux et financiers sur la place de l'agriculture dans la gestion des espaces naturels et ruraux mi chemin entre production agricole et maintien de la biodiversité entre construction paysagère et modes d'occupation de l'espace cet ouvrage a pour ambition de démontrer l'ampleur des questions abordées par la forme actuelle de la Politique agricole commune PAC La question agricole telle qu'ici traitée renvoie bien deux questions d'ordre politique Dans un monde toujours plus urbain quelle place voulons nous accorder aux espaces naturels et agricoles et leur biodiversité Entre économie de marché et fonds publics pour l'environnement quelle part de richesse collective souhaitons nous accorder à la nature Le dialogue entre dix sept chercheurs venus de disciplines aussi diverses que la géographie le droit l'écologie l'aménagement de l'espace l'économie et l'agronomie fait apparaître une métamorphose fondamentale de l'activité agricole

Études de l'OCDE sur l'eau Qualité de l'eau et agriculture Un défi pour les politiques publiques OECD, 2012-03-12 Ce livre propose des analyses et des orientations sur les aspects de la gestion des ressources en eau qui touchent l'économie la finance et la gouvernance

Manuel de droit européen de l'environnement et du climat Patrick Thieffry, 2021-10-14 Le présent Manuel de droit européen de l'environnement et du climat constitue la 3^e édition de l'ouvrage jusqu'ici intitulé Manuel de droit européen de l'environnement Il est adossé au Traité du même nom et associé au Handbook of European Environmental and Climate Law publiés dans la même collection avec lesquels il partage une même architecture Le Traité fournit une approche plus approfondie avec une perspective historique politique et jurisprudentielle et surtout un appareil scientifique plus complet L'inclusion dans le titre de l'ouvrage de la dimension climatique déjuguée dans chacune des précédentes éditions manifeste l'importance qu'elle y a prise en l'absence d'une politique européenne et d'une base juridique autonome Le droit du climat est couvert dans ses multiples occurrences tout au long de l'ouvrage ses spécificités notées et

leurs conséquences reconnues en particulier eu égard au contexte international in dit et porteur d'interventions juridiques radicalement nouvelles un véritable chambardement des approches classiques par l'instauration d'une nouvelle gouvernance pour la mise en œuvre de l'accord de Paris et de la législation européenne qui en résulte. Les itératives révisions des législations environnementales sont bien entendu aussi mises en perspective notamment avec la montée en puissance de l'économie circulaire et la proposition d'un Pacte vert pour l'environnement. L'immixtion croissante des droits fondamentaux est désormais analysée à la lumière de la charte des droits fondamentaux de l'Union, la convention européenne de sauvegarde des droits de l'homme CEDH. Plus généralement le développement du contentieux environnemental et climatique se manifeste par delà les traditionnels recours aux juges de l'Union devant les juridictions nationales au-delà du classique contentieux administratif jusque dans le contentieux international privé et même devant les juridictions arbitrales.

Genetically Modified and non-Genetically Modified Food Supply Chains Yves Bertheau, 2012-09-10 In the European Union nations and other countries including Japan Australia and Malaysia it is a legal requirement that food products containing genetically modified organism (GMO) materials are labelled as such in order that customers may make informed purchasing decisions. For manufacturers and consumers to be confident about these assertions systems must be in place along the entire food chain which support the co-existence of GM and non GM materials whilst maintaining a strict segregation between the two. This book is an output of a European Union funded project entitled Co-Extra: GM and non GM food and feed supply chains: their Co-Existence and Traceability. The objective of this four year project is to provide practical tools and methods for implementing co-existence that will enable the co-existence of genetically modified GM and non GM crops, enable the segregation and tracing of genetically modified organism (GMO) materials and derived products along the food and feed chains, anticipate the future expansion of the use of GMOs. The project is designed to foster a robustly science based debate amongst all of the stakeholders involved in the food and feed chains and the tools will be assessed not only from a technical point of view but with regard to the economic and legal aspects. It also surveys the GMO related legal regimes and practices that exist in and beyond the EU. This book examines the practical tools and methods available to implement the co-existence and traceability of GM and non GM food materials along the entire food and feed chains as demanded by consumers and by legislation in force in the EU and elsewhere. GM and Non GM Supply Foods is a source of valuable information for food manufacturers, food research institutions and regulatory bodies internationally.

Concilier agriculture et gestion de la biodiversité Lisa Durand, Marie Capière, Anne-Sophie Carpentier, Jacques Baudry, 2013-12-27 Nagoya en 2010 la communauté internationale a réaffirmé l'objectif de préservation de la biodiversité y compris la biodiversité ordinaire à l'horizon 2020. Un des enjeux principaux pour y parvenir est d'acquiescer des connaissances scientifiques et de les rendre accessibles aux acteurs publics aux parties prenantes et au grand public. Le programme de recherche Action publique Agriculture et Biodiversité Diva a pour but de mieux comprendre les interactions différentes échelles entre les politiques publiques et la biodiversité sur les territoires agricoles. Son originalité est d'englober les composantes sociales et écologiques portant sur des agrosystèmes divers et des entités biologiques variées. Ce programme met en évidence la nécessité d'adapter les mesures des politiques agricoles aux conditions régionales et de les intégrer dans des dynamiques sociales collectives pour prendre en compte les enjeux agricoles sociaux politiques et écologiques. Cet ouvrage présente les résultats très concrets des dix-huit projets du programme Diva regroupés en quatre thématiques cadres réglementaires et outils juridiques en agriculture et environnement dynamiques sociales de la biodiversité dynamiques écologiques de la biodiversité et intégration des politiques de biodiversité. Les enjeux pour la recherche et les apports pour la gestion font l'objet d'un résumé par chapitre. La synthèse est une expertise collective scientifique publiée en 2009. *Agricultures et biodiversité*. Quel est le complément de cet ouvrage ? Rédigé dans un langage clair cet ouvrage est accessible aux enseignants comme aux étudiants et aux professionnels du développement agricole de la protection de l'environnement et des collectivités territoriales.

Politiques agricoles : Suivi et évaluation 2024 (version abrégée) L'innovation au service de la croissance durable de la productivité

OECD, 2024-11-06 Ce rapport annuel de suivi et d'évaluation porte sur les politiques agricoles de 54 pays : les 38 pays de l'OCDE, les 5 États membres de l'UE non membres de l'OCDE et 11 économies émergentes. Il montre qu'en dépit de certaines baisses modestes observées récemment, le soutien à l'agriculture est resté proche des niveaux record atteints il y a peu. Si le soutien n'a pas beaucoup changé, les politiques agricoles ont pris un caractère à la fois réactif et proactif en ce qu'elles rendent le secteur mieux équipé pour relever les défis actuels et ambitionnent parallèlement de garantir que les systèmes alimentaires sauront s'adapter à l'évolution de la conjoncture. Le rapport de cette année est centré sur les politiques qui favorisent la croissance durable de la productivité en agriculture. Les pouvoirs publics appliquent de nombreuses approches différentes pour faire progresser la productivité tout en préservant les ressources naturelles et en réduisant les émissions de gaz à effet de serre d'origine agricole. Cependant, comme le relève le rapport, il importe qu'ils définissent des objectifs clairs en matière de croissance durable de la productivité et des indicateurs des progrès mesurables pour s'assurer que les politiques atteignent les objectifs qu'ils leur assignent. En outre, un usage plus efficace du soutien aux producteurs afin de promouvoir l'innovation et la durabilité environnementale au niveau des exploitations et un recentrage du soutien global sur la R-D ciblée permettraient de mieux mettre profit les dépenses publiques pour produire des biens publics et assurer une croissance durable de la productivité. Dans la lignée de la Déclaration publiée par les ministres de l'Agriculture réunis à l'OCDE en 2022, le rapport décrit un programme en sept points pour rendre l'agriculture plus durable, plus productive et plus résiliente, ainsi que pour rendre le soutien et les marchés agricoles plus efficaces et efficaces.
