

An Introduction to Writing in APA Style

This document provides an introduction to writing in American Psychological Association (APA) style. All of the information in this document is contained within the **seventh edition** of the Publication Manual of the American Psychological Association. If you need more details, please refer to the APA manual available in the: Douglas College Library, Psychology Lab, and Learning Centre.

Student papers for psychology courses usually fall into 2 categories: a literature review or an empirical study.

Literature Review

A literature review, also referred to as a “narrative literature review”, provides a narrative summary or evaluation of the findings or theories of an area of research. A thorough, if not exhaustive, search of published work (qualitative, quantitative, mixed-model research) is conducted for a given topic within a defined time frame. The resulting list of research articles are carefully examined to find trends, similarities, differences, contradictions, gaps, and inconsistencies. The resulting literature review synthesises this information resulting in an overview of past research with suggestions for future research. In sum, the narrative literature review should:

- define and clarify the problem;
- summarise previous research by identifying trends, similarities, differences, contradictions, gaps, and inconsistencies; and
- suggest directions for future research.

The organisational structure of a narrative literature review is at the author’s discretion. The paper may be organised based on similarities in concepts, research methodology, outcomes, theoretical perspectives, etc., with subsections detailing specifics when necessary. A literature review consists of, at minimum:

- title page
- introduction
- body — divided into sections and/or subsections
- conclusion
- references list

Empirical Study

An empirical study is a report of original research (experimental or correlational) in which an hypothesis is tested; data is collected; and the results are presented and evaluated. An empirical study consists of, at minimum:

- | | |
|----------------|--------------|
| • title page | • results |
| • abstract | • discussion |
| • introduction | • references |
| • method | |

Formatting for a literature review and empirical study follows the same conventions. Because the sections within an empirical study are more prescriptive, this document focuses on writing an empirical study.

The Psychology Major's Handbook Tara L. Kuther, 2024-02-19 Research shows that today's students are unique. Whether anxious, overwhelmed, or too busy to ask for help, modern students trust and turn to the resources at their fingertips for guidance. Tara Kuther created *The Psychology Major's Handbook* for this purpose to bridge the gap between advisor and manual. Created to support and follow along with a student through college, this text provides the support of an advisor as students navigate choosing a major, learning how to study, writing papers, and deciding what to do after college. Within each chapter, Kuther supports learners in applying concepts to their own lives through embedded exercises. The updated Sixth Edition encourages students to take an active role in their education and explains all of the ways that students can influence their own college experiences. Three individual chapters emphasize academics and cover crucial study and college skills such as writing a review paper and an APA Style empirical paper. The final four chapters of the text focus on bachelor's and graduate opportunities to help students look past graduation.

IBM SPSS for Introductory Statistics Karen C. Barrett, Nancy L. Leech, Gene W. Gloeckner, George A. Morgan, 2025-09-26 IBM SPSS for Introductory Statistics is designed to help students learn how to analyze and interpret research in easy-to-understand language. The authors show readers how to choose the appropriate statistic based on the design and to interpret outputs appropriately. There is such a wide variety of options and statistics in SPSS that knowing which ones to use and how to interpret the outputs can be difficult. This book assists students with these challenges. Comprehensive and user-friendly, this book prepares readers for each step in the research process: design, entering and checking data, testing assumptions, assessing reliability and validity, computing descriptive and inferential parametric and nonparametric statistics, and writing about results. Dialog windows and SPSS syntax along with the output are provided. Several realistic data sets are used to solve the chapter problems and are available as an online resource. This edition includes the following: Updated chapters and screenshots; Additional SPSS work problems; Callout boxes for each chapter indicating crucial elements of APA style and referencing outputs. IBM SPSS for Introductory Statistics is an invaluable supplemental or lab text book for students. In addition, this book and its companion IBM SPSS for Intermediate Statistics are useful as guides/reminders to faculty and professionals regarding the specific steps to take to use SPSS and/or how to use and interpret parts of SPSS with which they are unfamiliar.

Writing Between the Lines Douglas Flemons, 2001-12 An accessible guide for writers in the social sciences. Author Douglas Flemons walks readers through the process of researching, organizing, creating, and editing papers, theses, and dissertations. The guiding premise here is that keeping track of relationships between words, sentences, and paragraphs will enable writers to compose clear, thoughtful, aesthetic prose.
