treating physician to any potential adverse reactions in advance Another perk of CPOE is that it lets doctors track their orders as they progress through the system This provides an additional tool for doctors to assess prescription issues and revise them to remove human error as a potential cause A logical outgrowth of AI research machine learning emerged with the field s maturation Researchers and doctors often turn to machine learning when faced with challenging statistical computations When people talk about healthcare informatics they usually imply the study of how to use machine learning in conjunction with healthcare data to find important trends in healthcare That is why healthcare informatics is all on finding patterns in data so you can learn more The broad usage of electronic health records EHRs has helped bring down the cost of medical treatment by making it easier for hospitals to access and exchange their patients medical information Cuts to overhead and elimination of superfluous health exams likely contributed to this price drop Nevertheless with the current state of EHR administration it is difficult to collect and analyze clinical data for trends and patterns across distinct populations This is because there is now a great deal of uncertainty around the administration of EHR systems The American Recovery and Reinvestment Act ARRA of 20091 and similar programs have made great strides in the direction of standardizing the digitalization of medical records This makes the possibility of building massive medical databases a real possibility When data is retrieved from these massive archives machine learning may be employed to create forecasts and comprehend patterns in other domains Finding strategies to avoid the computational difficulties that are preventing the distribution sharing and standardization of electronic health records EHRs is the fundamental objective of research that is being conducted in this area Because these databases contain sensitive information on patients the objective is to create open access databases that are not just secure but also resistant to a wide variety of cyber threats This is because the databases contain sensitive information about individual patients The regional medical databases that are given below are some samples of some of the most well known databases in the country Before these vast data repositories of medical information can be developed there are a number of obstacles that need to be overcome as will be illustrated in the following sections substantial expenditures in research and computer resources are required in order to handle these challenges In order to resolve these challenges it is necessary to have a significant amount of money For instance in order to integrate newly developed technologies for medical devices and the data that they generate it will be necessary to manage data structures that are always evolving in order to accommodate these new technologies It is inevitable that this will occur due to the fact that it will be essential to adapt to the new technology **Psychologists' Desk Reference** Gerald P. already passionate about and committed to case management excellence Together our vision coalesced to form this competency based framework for advancing case management captured by an acronym which defined the essence of professional practice COLLABORATE We spent hours discussing the implications of a perceived epidemic involving less than productive interactions between individuals working under the title of case manager with consumers providers and clinical colleagues These accumulated experiences heightened our commitment to lead much needed change Our conversation endured over many months as we realized a shared Respect for case management s rich heritage in healthcare across professional disciplines and practice settings Concern for those factors which devalue case management s professional standing Agreement that while the practice of case management transcends many representative professional disciplines and educational levels each stakeholder continues to cling to their respective stake in the ground and Belief of the importance for case management to move from advanced practice to profession once and for all COLLABORATE was borne from a vision the mandate to solidify a foundation for case management practice which combines unique action oriented competencies transcends professional disciplines crosses over practice settings and recognizes educational levels The ultimate focus is on improving the client s health care experience through the promotion of effective transdisciplinary collaboration COLLABORATE recognizes the hierarchy of competencies and practice behaviors defined by the educational levels of all professionals engaged associate bachelors masters and doctoral degrees across practice disciplines Through this approach every qualified health and human service professional has a valued place setting at case management s ever expanding table Each of the competencies are presented as mutually exclusive and uniquely defined however all are complementary and call on the practitioner to conduct work processes in a wholly integrated manner While appearing in order for the acronym s sake they are not necessarily sequential Ultimately case management is an iterative process When united in a comprehensive and strategic effort the COLLABORATE competencies comprise a purpose driven powerful case management paradigm The agility of this model extends to use of key concepts that include both action oriented verbs and nouns which are significant elements in any professional case management endeavor To date case management practice models have been driven by care setting and or business priorities Unfortunately this exclusivity has contributed to a lack of practice consistency due to shifting organizational and regulatory priorities However this is only one reason for a fragmented case management identity COLLABORATE recognizes and leverages these important influencers as critical to successful practice and quality client outcomes Interprofessional education and teamwork are beginning to emerge as the means to facilitate relationship building in the workplace Through this approach health care practitioners absorb the theoretical underpinning of intentionally work together in a mutually respectful manner which acknowledges the value of expertise of each care team stakeholder This educational approach provides the opportunity to engage in clinical practice that incorporates the professional standards to which we hold ourselves accountable Innovative and emerging care coordination models defined by evidence based

initiatives appear across the industry Each promotes attention to interprofessional practice in order to achieve quality patient centered care Herein lies an opportunity to demonstrate the value drawn from diverse expertise of case managers comprising the collective workforce However a critical prefacing stage of this endeavor involves defining a core practice paradigm highlighting case management as a profession The diverse and complex nature of population health mandates that case management intervene from an interprofessional and collaborative stance While inherent value is derived from the variety of disciplines this advanced model unifies case management s unique identity Now is the time to define and adopt a competence based model for professional case management COLLABORATE provides this framework This text is presented in four sections Section 1 Historical validation of why this practice paradigm is critical for case management to advance to a profession Section 2 Presentation of the COLLABORATE paradigm with a chapter to devoted to each distinct competency and the key elements Section 3 Practical application of the book s content for use by the individual case manager and at the organizational level and The Epilogue Summarizes the COLLABORATE approach in a forward looking context For the reader with limited time reviewing Section 2 provides the substantive meat associated with each of the competencies Our ultimate desire is that the COLLABORATE approach provides an impetus for all stakeholders e g practitioners educational institutions professional organizations to take the necessary steps toward unified practice in order to facilitate the transition of case management considered as a task driven job to its recognition as being a purpose driven profession The book provides a historical validation of why this new practice paradigm is critical for case management to advance as a profession presents the COLLABORATE paradigm with a chapter to devoted to each distinct competency and the key elements and covers the practical application of the book s content by individual case managers and at the organizational level **Handbook of Home Health Care Administration** Marilyn D.
