### **Analysis of Creationism in the United States from Scopes (1925) to Kitzmiller (2005) and its Effect on the Nation's Science Education System**

Elizabeth Watts, 2018 Creationism is based on a fundamental belief in the inerrancy of the bible and negatively affects science education because creationist proponents insist on the inclusion of supernatural explanations for the appearance of species in particular the origin of humans This detrimental effect on education is particularly relevant in the United States where almost 70% of the population rejects the idea of naturalistic evolution and the majority of American students struggle to meet the college readiness benchmarks in science and math This dissertation provides a comprehensive look at the issue from historical judicial and educational perspectives Twenty four legal cases in the United States regarding anti evolutionary strategies were analyzed in detail Strategic trends were identified ranging from the statewide banning of evolution in public schools to the required teaching of Creation Science The exact effect of creationist political activity was discerned through

the analysis of state science standards and textbook adoption processes which illustrated the creationists ability to lobby for a diminished coverage of evolution in science standards and textbooks It was found that despite attempts made by scientific and educational agencies to provide guidelines such as the Next Generation Science Standards the majority of American state science standards continue to be sub par and one of the major flaws of these standards is the overall attempt to weaken the coverage of evolution throughout the standards A similar loss of quality occurs in textbooks since publishers engage in self censorship in order to avoid controversial topics such as evolution in order to prevent their books from being rejected An examination of the free choice learning materials revealed that creationist proponents are very active and successful in producing books films and museums for the sole purpose of promoting creationism Moreover a brief look at the creationist movement in Germany provided a powerful comparison to the United States and elucidated the key components necessary for a creationist movement to exist and flourish namely the presence of fundamentalist willing to fight to get anti evolutionary materials introduced into science classrooms This study provides new insights into the creationist phenomenon present not only in the United States but also increasingly present in European countries such as Germany Understanding the detrimental link between creationism and science education will help the science community realize that this topic needs to be continually readdressed and that it is imperative that these creationist trends are not dismissed as inconsequential

they cover the essentials of technologies and provide a guide to relevant resources p      Sports, Media, and Society Kevin Hull, 2024-03-26 Whether espoused by sports leagues, teams, or individual athletes, social issues are part of the sporting world fabric. The sports media often plays the gatekeeper, deciding how messages are presented and to what extent they are covered. If at all. *Sports Media and Society* investigates the impact of societal issues in sports and how the media reports those stories. Why does the sports media operate in the manner that it does, and what is the impact of its decisions on the audience? With *Sports Media and Society*, there is now a resource that combines mainstay class discussion points, current case studies, and theoretical and historical foundations in one comprehensive text. The book's 34 chapters are each short and concise, a format preferred by instructors, covering a wide range of topics and easily digestible for students. Part I covers sports media history and the media's role as gatekeeper. Chapters explore the history and evolution of various media: newspapers, magazines, radio, television, and social media, and the business of and competition between sports media entities. Case studies examine NBC's Olympics coverage and the nimbleness of *Sports Illustrated* in the digital space. Part II showcases television's impact on how fans follow sports. Discussions include ABC's *Wide World of Sports*, which exposed viewers to events around the globe; ESPN's foray into 24/7 sports coverage; and Fox Sports' shocking NFL deal, which marked a new era in media rights negotiations and sports broadcasting technologies. The intersection of sports and social issues is the focus of part III. Numerous issues are addressed, punctuated by case studies involving key players and events related to each topic. Cases concerning Colin Kaepernick, USWNT, and coverage of women's sports, generally LGBTQ issues, and obstacles faced by women working in sports media are highlights, while examinations of social identity theory and framing provide context on how people identify with specific groups and how the media influences opinions. Athletes and sport entities are constantly in the news, not always in a positive light. Part IV addresses crisis management and communication, featuring case studies about Tiger Woods, Lance Armstrong, LeBron James, The Decision, Kobe Bryant's death, and the misreporting of facts surrounding it, and the Houston Astros sign-stealing scandal. The text concludes with part V, which explores emerging trends in sports media and society. Through social media, virtually anyone can become a thought leader, wresting control from traditional outlets, and teams and athletes can dialogue directly with fans, effectively sidelining sports journalists. Chapters on the formerly taboo subjects of athlete mental health and sports wagering, as well as the exploding popularity of esports, round out the text. Sports shape our culture in numerous ways, and the sports media plays a transformative role in how it occurs. *Sports Media and Society* prepares tomorrow's sports journalists and communicators to venture beyond the how-tos of developing content to understanding the whys behind it.      *Electronic Commerce* Efraim Turban, David King, Jae Kyu Lee, Ting-Peng Liang, Deborah C.
