This space-egg houses all necessary items one could possibly need, bathroom, kitchen, lighting, a bed and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.

BLOBV83

The design started with the idea of creating a portable, on-site extension to the house, one with heavy, rapidly built-in building techniques.

With the existing site limitations and knowing these boundaries at the same time, it was proposed by designing a mobile unit, a blob.

An on-site construction and testing a high level of site-related control for each building model.

BLOB, as a mobile, portable building or site project, resulting in the overall building type.

Basically building a linear frame covered up with a stretching material and painted with polycarbonate. Shaped by building the polycarbonate and the linear frame, the space was built up with niches, typically 100cm. The space is between the water to water that was filled up with 100cm.

The space-egg houses all necessary items one could possibly need: bathroom, kitchen, lighting, storage and several niches to store the stuff. The nose can be opened automatically and functions as a kind of porch.

This mobile unit could easily use as an office, a greenhouse, a workshop, a garden house, or any other space. The mobile unit is portable, easy to use for a long period and it can be used in any place as needed.
