remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life *Living Stations* Manuela Triggianese, Olindo Caso, Yagiz Söylev, 2021-02-04

Due to the growing demand for mobility as a primary need for people to get to work to obtain personal care or to go travelling cities continue to be faced with new urban challenges Stations represent along mobility networks not only transportation nodes transfer points but also architectural objects which connect an area to the city's territorial plane and which have the potential to generate new urban dynamics In the compact city the station is simply no longer the space to access mobility networks as informed by their dry pragmatism but becomes an urban place of sociality and encounter an extended public space beyond mobility itself Which relationships and cross fertilizations can be significant for the design of the future living stations in the Municipality of Rotterdam How ought these stations to be conceived in order to act as public places for collective action Which archetypical devices can be designed to give a shape to the ambitions for these stations The station as a public space and catalyzer for urban interventions in the metropolitan area of Rotterdam is the focus of the research initiative presented in this publication City of Innovations Project Living Stations is organized around speculating and forecasting on future scenarios for the city of Rotterdam What is the future of Rotterdam with the arrival of a new metro circle line system In the past fifty years every decade of Rotterdam urban planning has seen its complementary metro strategy with profound connections with the spatial planning and architectural themes Considering the urban trends of densification and the new move to the city a new complementary strategy is required The plans to realize 50 000 new homes between the city center and the suburban residential districts in the next 20 years go together with the development of a new metro circle line consisting of 16 new stations 6 of which will connect the new metro line to the existing network Students of the elective City of Innovations Project AR0109 have been asked to develop ambitious but plausible urban and architectural proposals for selected locations under the guidance of tutors from the Municipality of Rotterdam and Complex Projects The Grand Paris Express metro project in France has inspired the course's approach Following the critical essays on the strategic role of the infrastructural project for city development interventions the 10 Visions X 5 Locations chapter is a systematization of the work of 35 master's students with input from designers of the City of Rotterdam and experts and academic from the University of Gustave Eiffel in Paris The research through design process conducted in the City of Innovations project Living Stations consists of documenting and analyzing the present urban

conditions of selected station locations in the City of Rotterdam and proposing design solutions and visualizations of the predicted development of these locations **Worlding Cities** Ananya Roy,Aihwa Ong,2011-06-09 Worlding Cities is the first serious examination of Asian urbanism to highlight the connections between different Asian models and practices of urbanization It includes important contributions from a respected group of scholars across a range of generations disciplines and sites of study Describes the new theoretical framework of worlding Substantially expands and updates the themes of capital and culture Includes a unique collection of authors across generations disciplines and sites of study Demonstrates how references to Asian power success and hegemony make possible urban development and limit urban politics

Spatial-Economic Metamorphosis of a Nebula City Abderrahman El Makhloufi,2013-02-11 This book analyses the long term spatial economic metamorphosis of Schiphol and the Schiphol region as archetypal for a wider international phenomenon of urban development of metropolises across the world It study the origins and course of urban development process by identifying and explaining which collective arrangements including their ambient factors and the visual representations of the city and urbanity have influenced this metamorphosis in a decisive manner 306090 08:

Autonomous Urbanism Emily Abruzzo,Alex Duval,Kjersti Monson,2005-07-14 Now in its fourth year this bi annual journal gains more and more momentum with each new issue Dedicated to addressing architectural issues from perspectives stretching across the theoretical spectrum 306090 gives voice to young up and coming architects designers and academics looking to push the envelope of architectural theory Much of architectural theory and criticism evaluates a project s success based on how it engages the surrounding environment and how it operates formally and aesthetically But there are other forces at play in architecture 306090 08 Autonomous Urbanism focuses on how legislation financing politics and other indirect influences affect architectural strategies How do architects and urbanists generate design methods that are conscious of law financing politics and the market 306090 08 investigates different design strategies focused on harnessing these forces and utilizing them to a purposeful end Vocabularies for an Urbanising Planet: Theory Building through

Comparison Christian Schmid,Monika Streule,2023-10-04 Cartography as an instrument for the analysis of urbanisation processes The speed scale and scope of urbanisation have increased dramatically in recent decades To decipher the rapidly changing urban territories across the planet we need a radical shift in the analytical perspective on urbanisation In this book a transdisciplinary international research team presents an expanded vocabulary of urbanisation processes through a comparison of Tokyo Hong Kong Shenzhen Dongguan Kolkata Istanbul Lagos Paris Mexico City and Los Angeles Based on a novel cartography and on detailed ethnographic and historical explorations this book systematically analyses the diversity of responses to urgent contemporary urban challenges It proposes a series of new concepts that allow us to assess the practical consequences of different urban strategies in everyday life Essential book on urbanism New evaluation models for urbanisation processes Comprehensive analyses and illustrations of the urban patterns of international metropolises

Comparison of urbanisation processes in eight metropolises around the world Constructing Metropolitan Space Jill Simone Gross, Enrico Gualini, Lin Ye, 2018-12-07 There is little question today that processes of globalization affect national and local economies governance processes and conditions for economic competitiveness in the major urban regions of the world In most liberal democratic countries these processes are occurring according to a rationale which attempts to combine strategies of state supported development with increasing local regional governmental decentralization and autonomy Against this background the issue of metropolitan development is being redefined worldwide along with its institutional frameworks modes of governance policy instruments and spatial planning strategies The overarching assumption of this volume is that metropolitan space far from being consolidated as a policy object is currently being redefined and in some instances constructed and contested as a scale through a variety of policy practices related to spatial economic development objectives Through case studies drawn from across four continents the authors reveal a range of interesting cross national commonalities concerning the power that state actors situated at various spatial scales exert as agents in these processes This volume interrogates key research issues raised by these developments and is intended as a contribution to the establishment of a globally comparative analysis of the construction of metropolitan spaces and scales under conditions of globalization and neoliberalization
