Democratic Stability in an Age of Crisis Agnes Cornell, Jørgen Møller, Svend-Erik Skaaning, 2020-04-15 The interwar period has left a deep impression on later generations This was an age of crises where representative democracy itself a relatively recent political invention seemed unable to cope with the challenges that confronted it Against the backdrop of the economic crisis that began in 2008 and the rise of populist parties a new body of scholarship frequently invoked by the media has used interwar political developments to warn that even long established Western democracies are fragile Democratic Stability in an Age of Crisis challenges this interwar analogy based on the fact that a relatively large number of interwar democracies were able to survive the recurrent crises of the 1920s and 1930s The main aim of this book is to understand the striking resilience of these democracies and how they differed from the many democracies that broke down in the same period The authors advance an explanation that emphasizes the importance of democratic legacies and the strength of the associational landscape i e organized civil society and institutionalized political parties Moreover they underline that these factors were themselves associated with a set of deeper structural conditions which on the eve of the interwar period had brought about different political pathways The authors empirical strategy consists of a combination of comparative analyses of all interwar democratic spells and illustrative case studies The book s main takeaway point is that the interwar period shows how resilient democracy is once it has had time to consolidate On this basis recent warnings about the fragility of contemporary democracies in Western Europe and North America seem exaggerated or at least that they cannot be sustained by interwar evidence Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in

association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Susan Scarrow Chair of the Department of Political Science University of Houston and Jonathan Slapin Professor Department of Political Science University of Zurich *The Impact of Globalization on the World's Poor* M. Nissanke,E. Thorbecke,2007-01-05 This book examines the various channels and transmission mechanisms such as greater openness to trade and foreign investment economic growth effects on income distribution technology transfer and labour migration through which the process of globalization affects different dimensions of poverty in the developing world

Military-Age Males in Counterinsurgency and Drone Warfare Sarah Shoker,2020-09-05 This book documents the political ecosystem that legitimized violent military action against military age males in US military operations after September 11 2001 It first introduces the military age male as a category used to identify insurgent combatants who have blended into civilian environments Though US officials maintained that military age males were not automatically assumed to be combatants defense and intelligence professionals nevertheless used biases related to gender age religion and race to interpret the battlespace Based on an analysis of the Obama administration's decision to exclude adolescent boys and men from drone warfare's collateral damage count and an examination of similar problems with combatant identification under the Bush administration the author argues that the military age male category contributed to the deterioration of civilian protection The concluding chapters discuss the link between counterinsurgency drone warfare and emerging trends in artificial intelligence and autonomy in weapons systems highlighting the relation between algorithmic discrimination and the misidentification of civilians as combatants
