 PERFORMANCE TASK

**OVERVIEW**   
You will step into the shoes of a playground designer. Your school has decided to build a new playground with a unique geometric structure. As the lead designer, you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design.

**TASK #1**   
Imagine you are designing a new playground for your school. The playground will have a unique geometric structure, and you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design. In the playground design, there are four angles labeled as A, B, C, and D. You know that:  
- Angle A is a right angle (90 degrees).  
- Angle B is a supplementary angle to Angle C.  
- Angle D is a complementary angle to Angle C.  
To find the measures of angles B, C, and D, you need to set up and solve equations based on the given information.

Write an equation to find each angle.

**TASK #2**   
Solve each equation that you wrote in task #1 to find the measure of each angle. Remember, Angle C is 40 degrees.
