example the symbols Er V S and Es may be combined to form the word SErVEs but not the word SEVErs because symbols would have to be split to form SEVErs One neat difference between ordinary word scrambles and chemical word scrambles is that chemical word scrambles allow us to make use of a vocabulary of longer words without effectively increasing the difficulty of the puzzle For example the word VErBAI is a 6 letter word but only a 4 symbol word When trying to rearrange the symbols Al Er B and V to form the word VErBAI there are fewer permutations to consider compared to rearranging the 6 letters A l e r b and v to form the word verbal We saw this as an excellent opportunity to make word scramble puzzles that involve a vocabulary of longer words The level of difficulty of this Chemical Word Scrambles puzzle book is EASY to MEDIUM This book includes words that have 4 to 6 symbols and therefore 4 to 12 letters most of the words have 5 to 9 letters Each puzzle features a challenge word made by rearranging the first symbol of each word A unique feature of this book is that there is a Hints section at the back separate from the Answers section for puzzlers who may be stuck and want to check just the first letter of the solution This travel size book comes in a convenient size for traveling and uses a different word list than the full size books
