The instructions presented above failed all three. With step one, there's no instruction on how to turn on the device. There's no review of instruction of how to be successful presented in the conclusion.
 2. There is no defined audience for these instructions. With a clear audience, that will depict the "...the level of familiarity your readers have with the topic (Korner)." If the target audience is for people who are familiar with technology, the instructions don't have to go as in-depth detail as if the target audience was asked for people that are not as tech-savvy. Then the instructions would have looked like to follow:
 3. There's no equipment needed list. That should be in the beginning of the instructions manual. With no equipment list, it could leave the reader with unanswered questions. What cord attaches to the computer to upload the recording? Questions such as that could be easily answered with an equipment list.
