FinTech in Financial Inclusion: Machine Learning Applications in Assessing Credit Risk Majid Bazarbash, 2019-05-17 Recent advances in digital technology and big data have allowed FinTech financial technology lending to emerge as a

potentially promising solution to reduce the cost of credit and increase financial inclusion. However, machine learning ML methods that lie at the heart of FinTech credit have remained largely a black box for the nontechnical audience. This paper contributes to the literature by discussing potential strengths and weaknesses of ML based credit assessment through 1 presenting core ideas and the most common techniques in ML for the nontechnical audience and 2 discussing the fundamental challenges in credit risk analysis. FinTech credit has the potential to enhance financial inclusion and outperform traditional credit scoring by 1 leveraging nontraditional data sources to improve the assessment of the borrower's track record 2 appraising collateral value 3 forecasting income prospects and 4 predicting changes in general conditions. However, because of the central role of data in ML based analysis, data relevance should be ensured especially in situations when a deep structural change occurs when borrowers could counterfeit certain indicators and when agency problems arising from information asymmetry could not be resolved. To avoid digital financial exclusion and redlining variables that trigger discrimination should not be used to assess credit rating. Siebel SOA & Fusion Blackbook, *Managing Operational Risk* Douglas Robertson, 2016-02-23. Operational risk is the risk of loss from inadequate or failed internal processes, people, and systems or from external events. This book explores the different types of operational risk that threaten financial institutions and focuses on practical due diligence methodologies that can be used to identify these risks before it is too late.

Technical Studies, 1973 **Consumer Attitudes Toward Credit Insurance** John M. Barron, Michael E. Staten, 2012-12-06. Consumer Attitudes Toward Credit Insurance provides the findings of a survey of approximately 3600 individuals who had the opportunity to purchase credit life insurance in conjunction with all types of consumer loans except first mortgages and credit cards. The survey that forms the basis of the book was conducted in 1993 by the Credit Research Center at Purdue University's Krannert Graduate School of Management. It replicates and expands upon four previous national studies of credit insurance consumers done between 1970 and 1985. Despite the generally positive findings of prior research with respect to consumer attitudes toward credit insurance, several open questions remain of interest to policy makers specifically the question of whether coercion is involved in the sale of the insurance. Consumer Attitudes Toward Credit Insurance addresses these outstanding issues. It presents a profile of who is currently being served by the credit
