Genetics and Evolution of Infectious Diseases Michel Tibayrenc, 2010-12-17 Genetics and Evolution of Infectious Diseases is at the crossroads between two major scientific fields of the 21st century evolutionary biology and infectious diseases The genomic revolution has upset modern biology and has revolutionized our approach to ancient disciplines such as evolutionary studies In particular this revolution is profoundly changing our view on genetically driven human phenotypic diversity and this is especially true in disease genetic susceptibility Infectious diseases are indisputably the major challenge of medicine When looking globally they are the number one killer of humans and therefore the main selective pressure exerted on our species Even in industrial countries infectious diseases are now far less under control than 20 years ago The first part of this book covers the main features and applications of modern technologies in the study of infectious diseases The second part provides detailed information on a number of the key infectious diseases such as malaria SARS avian flu HIV tuberculosis nosocomial infections and a few other pathogens that will be taken as examples to illustrate the power of modern technologies and the value of evolutionary approaches Takes an integrated approach to infectious diseases Includes contributions from leading authorities Provides the latest developments in the field *The Structure and Dynamics of Geographic Ranges* Kevin J. Gaston, 2003-05-01 No species occurs everywhere Indeed the majority are absent from most places and where they do occur they are usually quite rare Gaston discusses the structure of these distributions the structure of the geographic ranges of species Gaston is particularly concerned with the factors that determine the limits to a species geographic range how the sizes of those ranges vary and patterns in that variation Also considered are the distribution of individuals amongst those sites where a species does occur and what determines that distribution and some of the practical implications of all these Both in a pure and applied context ecologists need a broader perspective on their subject matter than has historically prevailed This book provides one such perspective A must have book for any researchers and graduate students studying macroecology biogeography and conservation biology Agroecology Stephen R. Gliessman, V. Ernesto Méndez, Victor M. Izzo, Eric W. Engles, 2022-09-30 Agroecology is at the forefront of transforming our food systems This bestselling textbook provides the essential foundation for understanding this transformation in all its components

agricultural ecological economic social cultural and political It presents a case for food system change explains the principles and practices underlying the ecological approach to food production and lays out a vision for a food system based on equity and greater compatibility with the planet's life support systems New to the fourth edition A chapter on Alternatives to Industrial Agriculture covering the similarities and distinctions among different approaches to sustainable agriculture A chapter on Ecological Pest Weed and Disease Management A chapter on Urban and Peri urban Agriculture A chapter on Agriculture and the Climate Crisis A revised analysis and critique of the food system's embeddedness in the extractive capitalist world economy that reflects ideas in the emerging field of political agroecology Streamlined treatment of agroecology's foundations in ecological science making the text more compatible with typical course curricula A Companion Website at <https://routledge-textbooks.com/textbooks/9781032187105> incorporates the entire contents of the updated practical manual Field and Laboratory Investigations in Agroecology split into student and lecturer resources These 24 sample investigations facilitate hands on learning that involves close observation creative interpretation and constant questioning of findings Groundbreaking in its first edition and established as the definitive text in its second and third the fourth edition of Agroecology captures recent developments in the field and forcefully applies the idea that agroecology is a science a movement and a practice Written by a team of experts this book will encourage students and practitioners to consider the critical importance of transitioning to a new paradigm for food and agriculture
