Materials Science for Future Applications Abhijeet R. Kadam, Kranti Zakde, Sanjay J. Dhoble, Hendrik C. Swart, 2025-06-20 Materials Science for Future Applications Emerging Development and Future Perspectives offers an overview of the materials used for progressive energy systems such as solar cells luminescent energy sensors and detectors and energy storage devices Today's worldwide energy and materials production is going through important changes which are developing novel prospects These developments and innovative technologies are changing the way energy is manufactured transported and spent The materials emphasis in this book conveys a new perspective and highlights the many challenges that are often overlooked in other literature An understanding of these challenges can be critical when working with new energy material technologies Particular devotion is given to the key materials and their conversion productivity extensive duration of permanency materials expenses and energy materials sustainability Materials Science for Future Applications offers a comprehensive introduction for students and researchers in both academia and industry who are interested in understanding the properties of emerging materials and their challenges *Riding the Tiger* Wilfried Aulbur, Amit Kapoor, 2016-11-18 How can one survive in a market which is volatile and uncertain What strategies have worked and not worked in the past What does it take to be successful in India What are the successful strategies applied by the likes of HUL Godrej Adani Ports and redBus So what does it take to Ride the Tiger Sound flexible strategy operational excellence and dedication to customer centric innovation But what does that really mean How have successful Indian companies managed challenges in an extremely price sensitive market In this book Wilfried Aulbur and Amit Kapoor look at successful and sometimes not so successful strategies operations and innovations in India They have distilled lessons from their decades of practical work experience in the country From large family conglomerates like Tata and Godrej to newer additions like Adani from MNCs like Maruti Suzuki to start ups in Bangalore and Gurgaon the book explores key learnings from all four kinds of companies in an Indian context and provides useful insights into how business is done in India

Technologies for Smart Cities Yuri A. Vershinin, Fedor Pashchenko, Cristina Olaverri-Monreal, 2022-08-18 This book gives readers an overview about technologies that are useful for developments related to Smart Cities Some technologies are already available such for example as smart meters for electricity and gas in buildings But there are possibilities to incorporate existing devices into wider networks with other smart devices that currently operate independently This in turn will considerably improve the reduction of the energy consumption in buildings reduction of emission pollutions in cities and improvement of the well being of people The other objective of this book is to introduce readers to new technologies which are not yet implemented in areas related to the efficient functioning of cities For example areas related to Intelligent Transport Systems are mostly developed for the optimization of the traffic flow reduction of accidents on roads improvement of the safety of drivers and related to road transportation problems The rapid advances in Blockchain technologies are also
