Teaching Climate Science in the Elementary Classroom Stephanie Sisk-Hilton, 2023-12-19 Discover new ways to help elementary students engage with and understand the world around them through place-based hope-filled learning about the causes, impacts, and responses to climate change. This book features foundational climate concepts, easily implementable activity plans, and inspiring examples of student engagement. Each chapter begins with a short vignette pulled from the author's considerable teaching experience in engaging students in concepts of climate change and climate justice, followed by content-focused sections and recommendations for student activities and projects. The author provides stories of hope-filled action to invite teachers to look for and reflect on similar narratives in their own communities. Sample units of study for grades K-5 show teachers how key ideas from each chapter come together into an instructional plan that incorporates the three dimensions of NGSS and can fit into the broader outline of their school year. This resource is an accessible tool to support any elementary educator in building their own knowledge base and integrating the important and timely issues of climate change into their classroom.

Distance Learning for Elementary STEM Amanda Thomas, 2021-02-17 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes. Online and distance learning may sound fairly straightforward. Instead of learning in a classroom setting, students learn at home with the assistance of online resources. But classroom learning does not always translate easily to online settings, particularly at the elementary level where children should be actively engaging in activities, exploration, and discussion. From designing a zoo to learning to garden to exploring the night sky, you'll find eight STEM lessons that are creative, hands-on, and engaging for elementary learners. Written for teachers and parents, the book unpacks STEM integration across multiple subjects with connections to the ISTE Standards. The book also includes play-based lessons for young learners and ideas for innovative design challenges. Each of the eight lessons includes an overview of materials, resources, time, and supervision needed. Suggested resources to explore, such as simulations and virtual field trips, supplementary learning materials such as questions and quizzes, ideas for games and reinforcement, hands-on activities, and engineering design challenges. Connections to various content areas, as well as children's books, movies, and art, to keep the learning going after the lesson is completed. Concluding with a model for designing online and distance STEM learning for elementary-aged children, this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students.

Complex Networks IX Sean Cornelius, Kate Coronges, Bruno Gonçalves, Roberta Sinatra, Alessandro Vespignani, 2018-02-15 This book aims to bring together researchers and practitioners working across domains and research disciplines to measure, model, and visualize complex networks.
