Answer ALL Questions

(10 X 10 = 100 Marks)

1. For the signal $x(t)$ shown in figure, draw the signals:

- (a) $x(t-1)$
(b) $x(2-t)$
(c) $x(2t+1)$
(d) $x(4-\frac{t}{2})$
(e) $\{x(t) + x(-t)\}u(t)$

2. a) Find whether the following signals are periodic, if yes, find the periodicity

i. $x(t) = 2 \cos t + 3 \cos \frac{t}{3}$

ii. $x(t) = 2 \cos \pi t + 7 \cos t$

[5]

- b) Determine whether the following signals are energy signals or power signals and calculate their energy or power

a) $x(t) = \text{rect}\left(\frac{t}{T_0}\right)$

b) $x(t) = \cos^2 \omega_0 t$

c) $x(t) = \text{rect}\left(\frac{t}{T_0}\right) \cos \omega_0 t$

[5]

3. The following CT systems are described using their input-output relationships between the input signal $x(t)$ and output $y(t)$. Determine if the CT systems are: (i) linear; (ii) time-invariant; (iii) stable; and (iv) causal.

(a) $y(t) = x(t-2)$

(b) $y(t) = tx(t+10)$

(c) $y(t) = \begin{cases} x(t) - x(t-5) & t \geq 0 \\ 0 & t < 0 \end{cases}$

4. Obtain the trigonometric Fourier series of the periodic waveform shown in the figure below:

Handwritten Fourier series calculation:

$$\frac{1}{2\pi} \int_{-\pi}^{\pi} f(t) dt = \frac{1}{2\pi} \left[\frac{t^2}{2} \cos 2\omega_0 t + \frac{t^2}{2\omega_0} \sin 2\omega_0 t - \frac{2t \cos 2\omega_0 t}{2\omega_0} + \frac{2}{\omega_0^2} \sin 2\omega_0 t \right]_{-\pi}^{\pi}$$

Tools for Thought Howard Rheingold, 2000-04-13 In a highly engaging style Rheingold tells the story of what he calls the patriarchs pioneers and infonauts of the computer focusing in particular on such pioneers as J C R Licklider Doug Engelbart Bob Taylor and Alan Kay The digital revolution did not begin with the teenage millionaires of Silicon Valley claims Howard Rheingold but with such early intellectual giants as Charles Babbage George Boole and John von Neumann In a highly engaging style Rheingold tells the story of what he calls the patriarchs pioneers and infonauts of the computer focusing in particular on such pioneers as J C R Licklider Doug Engelbart Bob Taylor and Alan Kay Taking the reader step by step from nineteenth century mathematics to contemporary computing he introduces a fascinating collection of eccentrics mavericks geniuses and visionaries The book

was originally published in 1985 and Rheingold's attempt to envision computing in the 1990s turns out to have been remarkably prescient. This edition contains an afterword in which Rheingold interviews some of the pioneers discussed in the book. As an exercise in what he calls retrospective futurism, Rheingold also looks back at how he looked forward.

Quantitative Logic and Soft Computing Bing-Yuan Cao, Shuili Chen, Guojun Wang, Sicong Guo, 2010-10-14. Admittedly the notion intelligence or intelligent computing has been around us for several decades implicitly indicating any non-conventional methods of solving complex system problems such as expert systems and intelligent control techniques that mimic human skill and replace human operators for automation. Various kinds of intelligent methods have been suggested: phenomenological or ontological, and we have been witnessing quite successful applications. On the other hand, Soft Computing Techniques is the concept coined by Lot Zadeh referring to a set of approaches of computing which parallels the remarkable ability of the human mind to reason and learn in an environment of uncertainty, imprecision, and partial truth. Such a notion is well contrasted with the conventional binary logic-based hard computing and has been effectively utilized with the guiding principle of exploiting the tolerance for uncertainty, imprecision, and partial truth to achieve tractability, robustness, and low solution cost. The soft computing techniques are often employed as the technical entities in a tool box with tools being FL, ANN, Rough Set, GA, etc. Based on one's intuition and experience, an engineer can build and realize human-like systems by smartly mixing proper technical tools effectively and efficiently in a wide range of fields. For some time, the soft computing techniques are also referred to as intelligent computing tools.

The Road to Universal Logic Arnold Koslow, Arthur Buchsbaum, 2014-10-10. This is the first volume of a collection of papers in honor of the fiftieth birthday of Jean-Yves Béziau. These 25 papers have been written by internationally distinguished logicians, mathematicians, computer scientists, linguists, and philosophers including Arnon Avron, John Corcoran, Wilfrid Hodges, Laurence Horn, Lloyd Humbert, Dale Jacquette, David Makinson, Stephen Read, and Jan Woleński. It is a state-of-the-art source of cutting-edge studies in the new interdisciplinary field of universal logic. The papers touch upon a wide range of topics including combination of logic, non-classical logic, square and other geometrical figures of opposition, categorical logic, set theory, foundation of logic, philosophy, and history of logic, Aristotle, Avicenna, Buridan, Schröder, MacColl. This book offers new perspectives and challenges in the study of logic and will be of interest to all students and researchers interested in the nature and future of logic.

Logic's Lost Genius Eckart Menzler-Trott, 2016-05-05. Gerhard Gentzen (1909-1945) is the founder of modern structural proof theory. His lasting methods, rules, and structures resulted not only in the technical mathematical discipline called proof theory but also in verification programs that are essential in computer science. The appearance, clarity, and elegance of Gentzen's work on natural deduction, the sequent calculus, and ordinal proof theory continue to be impressive even today. The present book gives the first comprehensive, detailed, accurate scientific biography expounding the life and work of Gerhard Gentzen, one of our greatest logicians until his arrest and death in Prague in 1945. Particular emphasis in the book is put on the conditions of

scientific research in this case mathematical logic in National Socialist Germany the ideological fight for German logic and their mutual protagonists Numerous hitherto unpublished sources family documents archival material interviews and letters as well as Gentzen's lectures for the mathematical public make this book an indispensable source of information on this important mathematician his work and his time The volume is completed by two deep substantial essays by Jan von Plato and Craig Smoryski on Gentzen's proof theory its relation to the ideas of Hilbert Brouwer Weyl and Gödel and its development up to the present day Smoryski explains the Hilbert program in more than the usual slogan form and shows why consistency is important Von Plato shows in detail the benefits of Gentzen's program This important book is a self contained starting point for any work on Gentzen and his logic The book is accessible to a wide audience with different backgrounds and is suitable for general readers researchers students and teachers

Fuzzy Logic in Smart Sustainable Cities Bhupinder Singh, Christian Kaunert, Komal Vig, 2025-06-04 This book focuses on fuzzy logic a paradigm shifting approach that challenges the binary simplicity of traditional logic systems The concept of fuzzy logics is a powerful tool capable of handling imprecise information and accommodating the vagaries of real world scenarios This marks the beginning of a journey that explores how fuzzy logics can bridge gaps and fills voids in our current strategies for achieving sustainable development goals relating to sustainable cities With regard to issues such as water scarcity energy affordability and urban sustainability the traditional linear approaches often fall short in capturing their complex dynamic and uncertain nature Fuzzy logics with their ability to handle imprecise information and uncertainties emerge as a promising tool for navigating the intricate web of variables that influence the attainment of these sustainable development goals This book bridges the gap between conventional disciplines such as engineering environmental science and urban planning by incorporating fuzzy logic ideas into talks on sustainable cities and offers insights into resource allocation strategies that will successfully lead to the intended sustainability goals by using models based on fuzzy logic It also examines how fuzzy logic adjusts to changing circumstances so that suggested fixes are still applicable in the long run

The Industrial Electronics Handbook J. David Irwin, 1997-05-09 From traditional topics that form the core of industrial electronics to new and emerging concepts and technologies The Industrial Electronics Handbook in a single volume has the field covered Nowhere else will you find so much information on so many major topics in the field For facts you need every day and for discussions on topics you have only dreamed of The Industrial Electronics Handbook is an ideal reference

Advances in Contemporary Logic and Computer Science Walter Alexandre Carnielli, 1999 This volume presents the proceedings from the Eleventh Brazilian Logic Conference on Mathematical Logic held by the Brazilian Logic Society co sponsored by the Centre for Logic Epistemology and the History of Science State University of Campinas São Paulo in Salvador Bahia Brazil The conference and the volume are dedicated to the memory of professor Mário Tourasse Teixeira an educator and researcher who contributed to the formation of several generations of Brazilian logicians Contributions were made from leading Brazilian logicians and their Latin American and European colleagues All papers were

selected by a careful refereeing process and were revised and updated by their authors for publication in this volume. There are three sections: Advances in Logic, Advances in Theoretical Computer Science, and Advances in Philosophical Logic. Well-known specialists present original research on several aspects of model theory, proof theory, algebraic logic, category theory, connections between logic and computer science, and topics of philosophical logic of current interest. Topics interweave proof-theoretical, semantical, foundational, and philosophical aspects with algorithmic and algebraic views, offering lively, high-level research results.

Fundamental Approaches to Software Engineering Jean-Pierre Finance, 2004-01-27. ETAPS 99 is the second instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprises five conferences: FOSSACS, FASE, ESOP, CC, TACAS, four satellite workshops, CMCS, AS, WAGA, CoFI, seven invited lectures, two invited tutorials, and six contributed tutorials. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.

Reviewing **Nlogic Systems Question Papers**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Nlogic Systems Question Papers**," an enthralling opus penned by a very acclaimed wordsmith, readers set about an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
