nineteenth centuries Fraktur manuscripts today are primarily studied for their decorative qualities The Word in the Wilderness takes a different view probing these documents for what they tell us about the lived religious experiences of the Protestant communities that made and used them and opening avenues for reinterpretation of this well known if little understood set of cultural artifacts The resplendent illuminated religious manuscripts commonly known as Fraktur have captivated collectors and scholars for generations Yet fundamental questions about their cultural origins purpose and historical significance remain Alexander Lawrence Ames addresses these by placing Fraktur manuscripts within a Pietist paradigm grounded in an understanding of how their makers viewed the Word or scripture His analysis combines a sweeping overview of Protestant Christian religious movements in Europe and early America with close analysis of key Pennsylvania devotional manuscripts revealing novel insights into the religious utility of calligraphy manuscript illumination and devotional reading as Protestant spiritual enterprises Situating the manuscripts in the context of transatlantic religious history early American spirituality material culture studies and the history of book and manuscript production Ames challenges long held approaches to Pennsylvania German studies and urges scholars to engage with these texts and with their makers and users on their own terms Featuring dozens of illustrations this lively engaging book will appeal to Fraktur scholars and enthusiasts historians of early America and anyone interested in the material culture and spiritual practices of the German speaking residents of Pennsylvania

**God Visible** Brian E. Daley,2018-01-12 God Visible Patristic Christology Reconsidered considers the early development and reception of what is today the most widely professed Christian conception of Christ The development of this doctrine admits of wide variations in expression understanding and interpretation that are as striking in authors of the first millennium as they are among modern writers The seven early ecumenical councils and their dogmatic formulations were crucial facilitators in defining the shape of this study Focusing primarily on the declaration of the Council of Chalcedon in AD 451 Brian E Daley argues that previous assessments that Christ was one Person in two natures the Divine of the same substance as the Father and the human of the same substance as us can sometimes be excessively narrow even distorting our understanding of Christ s person Daley urges us to look beyond the Chalcedonian formula alone and to consider what some major Church Fathers from Irenaeus to John Damascene say about the person of Christ     Elements of Divine Truth; a Series of Lectures on Christian Theology ...
