Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

Forestry and Water Conservation in South Africa Brett Bennett, Fred Kruger, 2015-11-11 This innovative interdisciplinary study focuses on the history science and policy of tree planting and water conservation in South Africa South Africa s forestry sector has sat often controversially at the crossroads of policy and scientific debates regarding water conservation economic development and biodiversity protection Bennett and Kruger show how debates about the hydrological impact of exotic tree planting in South Africa shaped the development of modern scientific ideas and state policies relating to timber plantations water conservation invasive species control and biodiversity management within South Africa as well as elsewhere in the world Forestry and Water Conservation in South Africa shows how scientific research on the impact of exotic and native vegetation led to the development of a comprehensive national policy for conserving water producing timber and protecting indigenous species from invasive alien plants Policies and laws relating to forests and water began to change in the late 1980s and early 1990s as a result of political and administrative changes within South Africa This book suggests that the country s contemporary policies towards timber plantations guided by the National Water Act of 1998 need to be reconsidered in light of the authors findings Bennett and Kruger also call for more interdisciplinary research and greater emphasis on integrated policies and management plans for forestry invasive alien plants water conservation and biodiversity preservation

Global Agriculture and the American Farmer Kimberly Ann

Elliott,2017-06-27 The United States is one of the world s largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U S policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U S support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U S policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries *Handbook*

on Cohesion Policy in the EU Simona Piattoni,Laura Polverari,2016-08-26 This Handbook covers all major aspects of EU Cohesion policy one of the most significant areas of intervention of the European Union Over five parts It discusses this policy s history and governing principles the theoretical approaches from which it can be assessed the inter institutional and multi level dynamics that it tends to elicit its practical implementation and impact on EU member states its interactions with other EU policies and strategies and the cognitive maps and narratives with which it can be associated An absolute must for all students of the EU *Food for All* Uma J. Them and Us Philippe Legrain,2020-10-15 Winner of the Diversity Inclusion and Equality Award at the Business Book

Awards 2021 Underpinned by scholarship entertaining Legrain's book fizzles with practical ideas The Economist The beauty of diversity is that innovation often comes about by serendipity As Scott Page observed one day in 1904 at the World Fair in St Louis the ice cream vendor ran out of cups Ernest Hami a Syrian waffle vendor in the booth next door rolled up some waffles to make cones and the rest is history Filled with data anecdotes and optimism Them and Us is an endorsement of cultural differences at a time of acute national introspection By every measure from productivity to new perspectives immigrants bring something beneficial to society If patriotism means wanting the best for your country we should be welcoming immigrants with open arms

Shared Governance for Sustainable Working Landscapes Timothy M. Gieseke, 2016-08-05 Sustaining our agricultural landscapes is no longer just a technical scientific or even political problem but it has evolved into a socially complex so called wicked problem of conflicting social governance and economics This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple Using Uber like business platform technology and a shared governance model a symbiotic demand for environmental benefits is created Enabling multi sector transactions for environmental benefits this platform innovation would remedy the tragedy of the commons the economic nemesis to achieving landscape sustainability In a nutshell to sustain our agricultural landscapes a transdisciplinary approach supported by a shared governance model housed within a multi sided platform is needed This book introduces an assessment framework identifying governance actors styles and ratios for socio ecological systems The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks It is aimed to anyone involved in sustainability science agricultural policy planning or integrated landscape design

Brazil's Emerging Role in Global Governance M. Fraundorfer, 2015-02-11 The author examines Brazil's emerging role as an important actor in various sectors of global governance By exploring how Brazil's exercise of power developed over the last decade in the sectors of health food security and bioenergy this book sheds light on the power strategies of an emerging country from the global south

Food in America Andrew F. Smith, 2017-02-16 This three volume work examines all facets of the modern U S food system including the nation's most important food and agriculture laws the political forces that shape modern food policy and the food production trends that are directly impacting the lives of every American family Americans are constantly besieged by conflicting messages about food the environment and health and nutrition Are foods with genetically modified ingredients safe Should we choose locally grown food Is organic food better than conventional food Are concentrated animal feed operations destroying the environment Should food corporations target young children with their advertising and promotional campaigns This comprehensive three volume set addresses all of these questions and many more probing the problems created by the industrial food system examining conflicting opinions on these complex food controversies and highlighting the importance of food in our lives and the decisions we make each time we eat The coverage of each of the

many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own minds The first volume Food and the Environment addresses timely issues such as climate change food waste pesticides and sustainable foods Volume two entitled Food and Health and Nutrition addresses subjects like antibiotics food labeling and the effects of salt and sugar on our health The third volume Food and the Economy tackles topics such as food advertising and marketing food corporations genetically modified foods globalization and megagrocery chains Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers journalists politicians and government officials and supporters and critics of various views related to food and beverages representing speeches advertisements articles books portions of major laws and government documents to name a few These documents provide readers additional resources from which to form informed opinions on food issues **Civic**

Engagement in Food System Governance Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences **Rebuilding resilient and sustainable agriculture in Somalia (Full report)**

Food and Agriculture Organization of the United Nations, 2018-11-02 This report documents the pressures on Somalia's livestock and crop subsectors over the years but notes that there is a cause for optimism thanks to the country's resilience and resources These include a variety of agroecological zones and vast tracts of arable land and areas suitable for livestock production which in turn can support markets export trade and overall growth **Federal Register**, 2013 **Yearbook of International**

Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Tectonic Evolution, Collision, and Seismicity of Southwest Asia** Rasoul Sorkhabi, 2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding large magnitude earthquakes volcanic landscapes petroliferous foreland basins historical civilizations as well as geologic outcrops that display the protracted and complex 540 m y

stratigraphic record of Earth's Phanerozoic Era Emerged from the birth and demise of the Paleo Tethys and Neo Tethys oceans southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia Arabia continental plates The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros Alborz Caucasus Taurus and Pontic mountains the region also includes the strategic marine domains of the Persian Gulf Gulf of Oman Caspian and Mediterranean This 19 chapter volume published in honor of Manuel Berberian a preeminent geologist from the region brings together a wealth of new data analyses and frontier research on the geologic evolution collisional tectonics active deformation and historical and modern seismicity of key areas in southwest Asia Ecoaccidents John Cairns, 2013-03-13 Dr Hueck explains in the History and Development of the NATO Advanced Research Workshop some ideas on the genesis of the Workshop The reader should understand that this volume is a preliminary analysis of a problem that has not received much attention The case histories for example are illustrative because one volume cannot include all histories or even those in Europe Consequently case histories are lacking on many parts of the world including central Europe and North America not because these are unimportant or less disastrous ecologically than the case histories covered but because selecting only a few illustrative cases was possible The geographic and ecological coverage was originally much broader but unfortunately some participants were unable to attend and this resulted in an even more skewed distribution geographically However participants generally agreed that the information necessary to analyze the problem was covered in sufficient depth by those in attendance and that other case histories would have been interesting but would probably not have caused substantive changes in the conclusions or recommendations The Workshop organizers did not selectively choose people companies or countries to the exclusion of others The committee selected a broad array of people countries and industries and the participants were those able to come prepare a manuscript and meet the other conditions Thus what appears to be a skewed distribution was not planned as such but was the consequence of people being unable to attend for various reasons

Debates Canada. Parliament. Senate, 1984 *Aid and Political Conditionality* Olav Stokke, 2013-04-03 Foreign aid has increasingly become subject to political conditionality In the 1980s some institutions made aid dependent upon the recipient countries economic policy reforms Market liberalisation was the primary instrument and objective In the 1990s such conditionality was brought one step further aid was now linked to political reforms affecting recipient countries governing systems requiring democracy human rights and good governance This volume looks at these developments and considers the conditionality policies of several European aid donors Such policies are also considered from recipient perspectives both from the Third World and Russia and the issue is also considered from a historical perspective Environmental Conservation through Ubuntu and Other Emerging Perspectives Munyaradzi Mawere, 2013-12-07 In spite of its surging popularity with scholars and environment conservation and management aid experts scientific environmental epistemology does not seem to be the answer to the forestry and environmental problems that Africa is facing Due to the lasting impacts of

colonialism and therefore Western scientism on Africa at the core of the conservation dilemma lies the conflict between scientific conservation epistemologies and local indigenous conservation epistemologies with the latter being the locals potential workable solution to the environmental problems haunting the continent It is in view of these circumstances that this book was born The book is a clarion call for the revival and reinstitution of indigenous conservation and management epistemologies not as a challenge to Western scientific conservation epistemologies but to complement efforts by Western science in easing the tapestry of environmental problems that haunt Africa and the rest of the world This is a valuable book for environmental conservationists land resource managers political social ecologists environmentalists environmental anthropologists environmental field workers and technicians and practitioners and students of conservation sciences
