Rising Power, Limited Influence Indrajit Roy, Jappe Eckhardt, Dimitrios Stroikos, Simona Davidescu, 2024-01-24 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations China's resurgence has spawned anxieties about an impending revision of the Liberal International Order Drawing on case studies of Chinese investments across Europe the contributors to this volume investigate the ways in which China translates its growing resources into effective influence with varying degrees of success They find that influence is most effectively achieved by harnessing the agency of states and societies in Europe towards China's preferences Fragmented and messy rather than unified and coherent these preferences comprise an amalgam of domestic regional and international considerations rather than aimed at revising world order Nevertheless as the contributors to this volume demonstrate the interaction of European agency and Chinese preferences could have a variety of unintended consequences that range from straining the Liberal International Order to strengthening it Against narratives that foreground inevitable conflict or assured cooperation Rising Power Limited

Influence innovates a dynamic framework to understand the granular ways in which states and societies in Europe interact with state and society in China to re shape the Liberal International Order Its contribution is three fold Conceptually it offers a relational definition of power that pinpoints attention to the ways in which China translates its growing investments in Europe towards influencing the preferences of host countries Empirically it outlines the different modalities through which China harnesses the agency of European countries towards its own fragmented preferences Theoretically the book introduces a dynamic framework to understand the interaction between state society relations in China with state society relations in European countries to comprehensively appreciate the extent limits and modalities of resurgent China s global influence
