Banking John Anderson,2023-12-21 In almost half the communities in small town and rural Canada that have a post office there are no bank or credit union branches Only about fifty four bank and credit union branches exist in the over 615 First Nations communities in Canada A growing number of urban areas in Canada have no accessible banks or credit unions Why Canada Needs Postal Banking offers a plethora of information about the banking industry that will shock ordinary Canadians In explaining the banking system that many of us take for granted the author reveals a deep and largely unrecognized gap between the services offered in densely populated urban spaces and those available in small towns rural and remote regions and Indigenous communities As a solution to this dearth in services John Anderson proposes a logical alternative to big private sector banks the post office Basing his argument on historical fact international experience and the exorbitant cost of traditional banking services the author builds a logical and compelling case for reestablishing banking services at Canada Post Composed of a collection of research papers interviews and opinion pieces Why Canada Needs Postal Banking provides convincing and well organized data to support the reintroduction of postal service banking in Canada Readers can absorb survey results that document citizen municipality and union support for this strategy Tables and graphics provide easy access for those who want to assess the statistical facts and figures at a glance Written in clear succinct and transparent language Why Canada Needs Postal Banking engages the reader while delivering surprising information In a landscape where challenges seem overwhelming much of the time this book proposes a solution that while not without its difficulties is implementable It delivers answers and alternatives that support business and individuals needs in different parts of the economy that have been for too long and too often overlooked **Psychopathology at School** Valerie Harwood,Julie

Allan,2014-03-26 Psychopathology at School provides a timely response to concerns about the rising numbers of children whose behaviour is recognised and understood as a medicalised condition rather than simply as poor behaviour caused by other factors It is the first scholarly analysis of psychopathology which draws on the philosophers Foucault Deleuze Guattari and Arendt to examine the processes whereby children s behaviour is pathologised The heightened attention to mental disorders is contrasted with education practices in the early and mid to late twentieth century and the emergence of a new

conceptualization of childhood is explored Taking education as a central component to the contemporary experience of growing up the book charts the ways in which mental disorders have become commonplace in childhood and youth from birth through to college and university but also offers examples of where professionals have refused to pathologise children's behaviour The book examines the extent of the influence of psychopathology on the lives of children and young people as well as the practices that infiltrate education and the possibilities for alternative educational responses that negate the diagnosis of mental disorder Psychopathology at School is a must read for anyone concerned about the growing influence of psychopathology in education and will be of particular interest to educated readers and to scholars students and professionals in education psychiatry psychology child studies youth studies nursing social work and sociology

Birth of a New Earth Adrian Parr, 2017-10-24 In response to unprecedented environmental degradation activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth The environmental movement has undeniably influenced even its adversaries as the language of sustainability can be found in corporate mission statements government policy and national security agendas However the price of success has been compromise prompting soul searching and questioning of the politics of environmentalism Is it a revolutionary movement that opposes the current system Or is it reformist changing the system by working within it In Birth of a New Earth Adrian Parr argues that this is a false

choice calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination Parr insists that environmental destruction is at its core a problem of democratization and decolonization It requires reckoning with militarism market fundamentalism and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence Birth of a New Earth locates the emancipatory work of environmental politics in solidarities that can bring together different constituencies fusing opposing political strategies and paradigms by working both inside and outside the prevailing system She discusses experiments in food sovereignty collaborative natural resource management and public interest design initiatives that test new models of economic democratization Ultimately Parr proclaims environmental politics is the refusal to surrender life to the violence of global capitalism corporate governance and militarism This defiance can serve as the source for the birth of a new earth

Creating Healthy and Sustainable Buildings Mateja Dovjak, Andreja Kuvec, 2019-05-28 The open access book discusses human health and wellbeing within the context of built environments It provides a comprehensive overview of relevant sources of literature and user complaints that clearly demonstrate the consequences of lack of attention to health in current building design and planning Current designing of energy efficient buildings is mainly focused on looking at energy problems and not on addressing health Therefore even green buildings that place environmental aspects above health issues can be uncomfortable and unhealthy and can lead to public health problems The authors identify many health risk factors and their parameters and the interactions among risk factors and building design elements They point to the need for public health specialists engineers and planners to come together and review built environments for human wellbeing and environmental sustainability The authors therefore present a tool for holistic decision making processes leading to short and long term benefits for people and their environment
