Question Paper Of Life Science In 2gauteng:

Himalayan Quality of Life Benjamin L. Saitluanga, 2017-04-18 The book is a study of intra urban inequality in quality of life QOL in Aizawl city The main objectives of the study include analysis of processes and patterns of social differentiation along the three dimensional space of Aizawl city as well as analysis of spatial inequality in QOL at the lowest administrative structure of the city An investigation into spatial pattern of residential differentiation was done at both horizontal and vertical spaces Spatial variation in well being of residents of Aizawl city and the quality of their immediate environment was also studied by taking both objective and subjective indicators The study employed a number of descriptive inferential and multivariate statistical techniques including correlation factor analysis principal component analysis cluster analysis and spatial autocorrelation methods like Moran's I and Local Indicators of Spatial Association LISA Mapping techniques and graphical methods like Choropleth map histogram and line graph were also used With the help of factor analysis the social space of Aizawl city was found to be differentiated along socio economic status family status household size status workers status and ethnic status The most important factor determining residential differentiation was socio economic status Choropleth map of factor scores reveals that the inner city localities were dominated by high socio economic class while poorer people dominated the peripheries Non local ethnic minorities were few but concentrated in some adjoining peripheral localities as well as in inner city localities which have been inhabited by their ancestors since the colonial period Vertical pattern of residential differentiation was also analyzed by taking income variable as a proxy of socio economic status Multi storey buildings in Aizawl city were co inhabited by both richer people and poorer people The richer people were found at the top floors while the poorer people occupied the basement floors Normally the owners of the buildings were found at the top floors while the basement floors were dominated by the renters Spatial variation in QOL was measured with the help of principal component analysis as a weighting technique by taking variables pertaining to both objective and subjective QOL dimensions The values of composite QOL index showed that the central localities have scored better than their peripheral counterparts Correlation analysis of the relationship between objective indicators and subjective indicators provided a low positive value indicating the absence of relationship between the two dimensions of quality of life Spatial autocorrelation analysis was also performed to see the pattern of clustering of spatially weighted QOL variables across Local Councils With the help of Global Moran's I spatial clusters and spatial outliers were observed for objective dimension of QOL within the study area The value of Moran's I was found to be insignificant for subjective QOL dimension indicating the absence of significant pattern of clustering The study also identified 7 social areas of Aizawl city on the basis of factor scores and composite scores of QOL variables calculated for all Local Councils The identification of clusters was taken out with the help of hierarchical clustering method of cluster analysis These clusters were labeled appropriate names and their characteristics were described in detail The thesis concluded with recommendation of designating these social areas as social development

Grab,2016-06-23 Ongoing climate change necessitates advances in our understanding of the interrelationships between climate landscape shaping processes and human activity over long time periods especially in areas that are already climatically stressed This volume presents new ideas on macroscale landscape evolution mountain fluvial and aeolian processes and environments in southern Africa a key region in the story of human evolution during the last two million years Interdisciplinary in scope it brings together an international team of experts to

synthesise the latest research and understanding of landscape human relationships in this region It incorporates results from the emerging fields of geoarchaeology and cultural landscapes and utilises the latest data and analytical techniques A key reference for researchers studying hominid evolution geoarchaeology and environmental change it provides a benchmark study of southern African landscape evolution during the Quaternary It will also appeal to professionals and policymakers with interests in future human landscape evolution in southern Africa *South African Journal of Science* ,2007 Unruly Cities? Chris Brook,Gerry Mooney,Steve Pile,2006-02 The text argues that cities are open to many forms of order and disorder both from within the city and outside They represent cities potentials as well as their problems It challenges the assumption that cities are threatened by disorder from below and that they might be ruled by order imposed from above

Breathing Life Into Fossils Travis Rayne Pickering,Kathy Diane Schick,Nicholas Patrick Toth,2007 Taphonomy the study of the processes leading to the fossilization of organic remains is one of the most important avenues of inquiry in human origins research Breathing Life into Fossils is a major contribution to taphonomic studies in paleoanthropology and natural history This book emanates from a Stone Age Institute conference celebrating the life and career of naturalist Bob Brain a pioneer in bringing taphonomic perspectives to human evolutionary studies Contributions by leading researchers provide a state of the art look at the maturing field of taphonomy and the unique perspectives it provides to research into human origins This important volume reveals approaches taken to the study of bone accumulations at prehistoric sites in Africa Eurasia and America and provides fascinating insights into patterns produced by carnivores by hunter gatherers and by our human ancestors **The Golden Thread** Fuad Udemans,2013 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret society s rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak one s current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today
