The African Book Publishing Record ,1999 **Progress, Change and Development in Early Childhood Education and Care** Elizabeth Coates,Dorothy Faulkner,2017-10-02 In 2000 the Millennium Development Goals set out targets aimed at creating a safer more prosperous and more equitable world If these goals were to be achieved children s lives would indeed be transformed In this collection achievements against these targets are identified with each contributor examining the progress made in early years provision in Australia China England Greece the Netherlands Portugal South Africa and Sweden They highlight the priorities and agendas of their respective governments and focus on the trends and issues which are particularly relevant to each situation thereby revealing the social and educational inequalities that persist across countries A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families It is clear that although the past two decades have seen many changes in attitude towards the importance of the early years of life politically economically and environmentally much still remains to be done if the Millennium Development Goals for young children and their families are to be fully met Despite this this volume demonstrates that those who work in this area continue to experience a deep concern for the well being of young children which transcends cultures frontiers and political and sectarian divides This book was originally published as a special issue of the International Journal of Early Years Education **Drawing for Science Education** Phyllis Katz,2017-03-23 This book argues for the essential use of drawing as a tool for science teaching and learning The authors are working in schools universities and continual science learning CSL settings around the world They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking sometimes direct observation and in other instances their memories The result is a collection of research and essays that offer theory techniques outcomes and models for the reader Young children have provided evidence of the perceptions that they have accumulated from families and the media before they reach classrooms Secondary students describe their ideas of chemistry and physics Teacher educators use drawings to consider the progress of their undergraduates understanding of science teaching and even their moral ethical responses to teaching about climate change Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted A physician explains how the history of drawing has been a critical tool to medical education and doctor patient communications Each chapter contains samples insights and where applicable analysis techniques The chapters in this book should be helpful to researchers and teachers alike across the teaching and learning continuum The sections are divided by the kinds of activities for which drawing has historically been used in science
