Question:

A 60.0 kg crate rests on a level floor at a shipping dock. The coefficients of static and kinetic friction are 0.760 and 0.410 , respectively. What horizontal pushing force is required to

- a) just start the crate moving and
- b) slide the crate across the dock at a constant speed?

Solution:

- a) By the definition of the coefficient of static friction we have:

$$\mu_s = \frac{F_{\text{appl}}}{W} = \frac{F_s}{N},$$

here, F_{appl} is the horizontal pushing force, $W = mg$ is the weight of the crate directed downward, F_s is the static friction force directed opposite to the horizontal pushing force and equal to it, N is the force of reaction directed upward and equal to the weight of the crate.

From this formula we can find the horizontal pushing force required to just start the crate moving:

$$F_{\text{appl}} = F_s = \mu_s N = \mu_s mg = 0.760 \cdot 60\text{ kg} \cdot 9.8 \frac{\text{m}}{\text{s}^2} = 447\text{ N}.$$

- b) By the definition of the coefficient of kinetic friction we have:

$$\mu_k = \frac{F_{\text{appl}}}{W} = \frac{F_k}{N},$$

here, F_{appl} is the horizontal pushing force, $W = mg$ is the weight of the crate directed downward, F_k is the kinetic friction force directed opposite to the horizontal pushing force and equal to it, N is the force of reaction directed upward and equal to the weight of the crate.

From this formula we can find the horizontal pushing force required to slide the crate across the dock at a constant speed:

Questions and Answers F. Kiefer, 2012-12-06 In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative This amounts to the claim that a yes no question such as Will John stay is derived from I ask you whether John will stay and a wh question such as Who came is derived from something like I ask you whether A came or B came or or X came Though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris Jerrold J Katz and Paul M Postal Katz Postal 1964 113 117 state a reading rule for Q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 Tell me which of the following is true John will stay or John will not stay 2 Tell me which of the following is true A came or B came or or X came Thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements *A Question and Answer Guide to Astronomy* Pierre-Yves Bely, Carol Christian, Jean-René Roy, 2017-03-23 Contains 250 questions and answers about astronomy particular for the amateur astronomer Questions Can't be Stupid, Answers Can Be !!!
