The Quest for Professionalism Georges Romme, 2016-01-29 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results The key thesis in this book is that The Quest for Professionalism must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education The Quest for Professionalism adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top toward management as a technology for distributing power and leadership throughout the organization

Kark, 2018-09-03 There has never been a better time to study practice and experience creative leadership In the fluid and

Leadership Contexts and Prospects builds upon a recently introduced multi context framework that integrates

system that emphasizes and rewards incremental research questions while reducing the incentives for scholars to conduct

challenging research This book challenges this status quo from accepted theories methodologies and paradigmatic

assumptions to the relevance or lack of for contemporary practice and the impact of key journals on scholars directions in

entrepreneurship research An invited selection of the younger generation of scholars within the field of entrepreneurship
