Construction Productivity in the Multilayer Subcontracting System Low Sui Pheng, Sim Jia Zheng, 2018-08-14 This book focuses on current subcontracting practices in the construction industry and their effects on Singapore s construction productivity It offers readers a better understanding of how the fragmentation of large and small firms in Singapore impacts construction productivity when operating under the commonly adopted multilayer subcontracting system MLSS which extends globally to the construction industries in other countries that have adopted the MLSS The book also assesses the effectiveness of subcontracting practices in helping local contractors improve their construction productivity and thereby improve the industry s overall productivity In closing it provides recommendations on how the problems associated with the MLSS can best be addressed and how its benefits can be capitalized on through organizational learning

Construction Project Management Peter Fewings, Christian Henjewe, 2019-03-21 Construction Project Management An Integrated Approach is a management approach to leading projects and the effective choice and use of project management tools and techniques It seeks to push the boundaries of project management to take on board future needs and user issues Integration of the construction project meaning closer relations between the project team the supply chain and the client is long overdue however despite some signs of growth in this area the industry nonetheless remains fragmented in its approach The role of the project manager is to integrate diverse interests and unify objectives to achieve a common goal This has now broadened to include a responsibility on the parts of both client and team to ensure that construction addresses current and future societal needs From an economic perspective a great deal of waste is connected with conflict thus a holistic approach that increases the efficiency and effectiveness of the task at hand will inject energy into project management This third edition now takes on board the impact of technology in building information modelling and other digitised technologies such as

artificial intelligence Together they open up avenues for more direct and incisive action to test creative design manufacture directly and communicate spontaneously and intuitively In time such technologies will change the role of project managers but will never take away their responsibility to be passionate about construction and to integrate the team A new chapter has been added that considers future societal needs This edition is also reordered to make the project life cycle and process chapters clearer This book combines best practice in construction with the theories underpinning project management and presents a wealth of practical case studies many new It focuses on all construction disciplines that may manage projects The book is of unique value to students in the later years of undergraduate courses and those on specialist postgraduate courses in project management and also for practitioners in all disciplines and clients who have experienced the frustration caused by the fragmentation of construction projects

Safe Design and Construction of Machinery Dr Elizabeth Bluff, 2015-04-28 The origin of this book is the compelling evidence that a high proportion of machinery related deaths and injuries are attributable to genuine and serious risks originating within machine design and construction Through a unique blending of rich empirical data coupled with safety human factors socio legal and learning scholarship Elizabeth Bluff provides both a nuanced account of firms performance for machinery safety and makes conceptual and theoretical contributions to understanding and explaining their performance These insights provide the foundations to enhance regulatory design and the book s conclusion recommends some innovative directions for regulatory interventions to sustain the safe design and construction of machinery

Handbook of Educational Psychology Lyn Corno, Eric M. Anderman, 2015-07-06 The third edition of the Handbook of Educational

Psychology is sponsored by Division 15 of the American Psychological Association. In this volume thirty chapters address new developments in theory and research methods while honoring the legacy of the field's past. A diverse group of recognized scholars within and outside the U.S. provide integrative reviews and critical syntheses of developments in the substantive areas of psychological inquiry in education, functional processes for learning, learner readiness and development, building knowledge and subject matter expertise, and the learning and task environment. New chapters in this edition cover topics such as learning sciences research, latent variable models, data analytics, neuropsychology, relations between emotion, motivation, and volition, EMOVO, scientific literacy, sociocultural perspectives on learning, dialogic instruction, and networked learning. Expanded treatment has been given to relevant individual differences, underlying processes, and new research on subject matter acquisition. The *Handbook of Educational Psychology*, Third Edition, provides an indispensable reference volume for scholars in education and the learning sciences, broadly conceived, as well as for teacher educators, practicing teachers, policy makers, and the academic libraries serving these audiences. It is also appropriate for graduate-level courses in educational psychology, human learning and motivation, the learning sciences, and psychological research methods in education and psychology.

Social Research Sotirios Sarantakos, 2017-09-16. From question development and research design to data collection and statistical analysis, this text guides the reader through every aspect of social research. Encouraging a critical approach in each chapter, this 4th edition includes enhanced coverage of internet sampling, mixed methods, conversation analysis, and feminist research.

Lean Construction 4.0 Vicente A. González, Farook Hamzeh, Luis Fernando Alarcón, 2022-12-30. This book introduces and develops the novel concept of Lean Construction 4.0. The capability of Lean Construction to effectively adapt the architecture/engineering/construction (AEC) industry to this new era of digital transformation requires a reconceptualization of the triad: people, processes, technology, as a foundation for the theoretical and practical framework of Lean Construction. Therefore, a shift towards Lean Construction 4.0 is required. Lean Construction 4.0 is a new, systems-wide thinking approach where synergies and overlaps between Lean Construction and digital smart technologies go far beyond BIM to reshape the way we design, manage, and operate capital projects in the modern age of automation. This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital smart technologies in order to channel research efforts to introduce and discuss current research and practice challenges and drivers, and future perspectives of Lean Construction 4.0. It is not the aim of the book to keep adding digits to the term Lean Construction to catch up with the industry revolutions as they go on. Instead, after reading this book, it will be undeniable for readers that the triad: process, people, technology, as proposed by Lean Construction 4.0, is required to achieve an effective, long-lasting digital transformation of the AEC industry. Thus, the aim of Lean Construction 4.0 is better explained by what it evokes: a future vision of construction systems comprising people, processes, and technology, using Industry 4.0/5.0 as a basis for technological innovation in the AEC industry, coupled with Lean Construction theory and practice, as a jettison.

for improved processes and systems integration The Lean Construction 4.0 concept coined and developed in this edited book is unique and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept More importantly Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive but to thrive

Counselling for Career Construction J. G. Maree, 2013-09-03 In this book career counselling history best practices as well as contemporary models and methods are brought together In reflecting on the past present and future of career counselling the story of the postmodern narrative or career construction approach and the model and methods used to advance careers in the 21st century is told A meta reflection concept is proposed based on career construction principles and practices and aimed at providing an examination of repeated reflection in career counselling Overall an attempt is made to craft a text that is not just specifically instructive but also more generally so Whereas the theory section includes much that is hands on and practical the inclusion of narratives in the practice section turns theory into practice Narratives illustrate the complexity and contextuality of partnering with clients toward re designed lives Ultimately the volume aims to demonstrate how Mark Savickas counselling for career construction approach can be used by clients to connect life themes in order to construct life portraits under the guidance of counsellors
