Laser Physics ,2008 Proceedings of the International Conference on QCD and Hadronic Physics, Peking University, China, 16-20 June 2005 ,2006 Canadian Journal of Physics ,2014 **Physics in Collision 5** B. Aubert, Lucien Montanet,1986 **Epidemics and Genocide in Eastern Europe, 1890-1945** Paul Weindling,2000-02-03 During the First World War delousing became routine for soldiers and civilians following the recent discovery that the louse carried typhus germs But how did typhus come to be viewed as a Jewish disease and what was the connection between the anti typhus measures during the First World War and the Nazi gas chambers in the Second World War In this powerful book Professor Weindling draws upon wide ranging archival research throughout East and Central Europe to the United States to provide valuable new insight into the history of German medicine from its response to the perceived threat of typhus epidemics from its Eastern borders He examines how German experts in tropical medicine took an increasingly racialised approach to bacteriology regarding supposedly racially inferior peoples as carriers of the disease So they came to view typhus as a Jewish disease By the Second World War as migrants and deportees had become conditioned to expect the ordeal of delousing at border crossings ports railway junctions and on entry to camps so sanitary policing became entwined with racialisation as the Germans sought to eradicate typhus by eradicating the perceived carriers Typhus had come to assume a new and terrifying genocidal significance as the medical authorities sealed the German frontiers against diseased undesirables from the east and gassing became a favoured means of disease eradication Australian Journal of Physics ,1998 Handbook of Geophysics and Space Environments U.S. Air Force Geophysics Laboratory,1985 **Scientific and Technical Aerospace Reports** ,1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *The Electrical Journal* ,1912 **Computational Fluid Dynamics Review 1998 (In 2 Volumes)** Mohamed M Hafez,Koichhi Oshima,1998-11-20 The first volume of CFD Review was published in 1995 The purpose of this new publication is to present comprehensive surveys and review articles which provide up to date information about recent progress in computational fluid dynamics on a regular basis Because of the multidisciplinary nature of CFD it is difficult to cope with all the important developments in related areas There are at least ten regular international conferences dealing with different aspects of CFD It is a real challenge to keep up with all these activities and to be aware of essential and fundamental contributions in these areas It is hoped that CFD Review will help in this regard by covering the state of the art in this field The present book contains sixty two articles written by authors from the US Europe Japan and China covering the main aspects of CFD There are five sections general topics numerical methods flow physics interdisciplinary applications parallel computation and flow visualization The section on numerical methods includes grids schemes and solvers while that on flow physics includes incompressible and compressible flows hypersonics and gas kinetics as well as transition and turbulence This book should be

useful to all researchers in this fast developing field
