Symposium entitled Causality and Locality in Modern Physics and Astronomy Open Questions and Possible Solutions was
held at York University Toronto during the last week of August 1997 It was a sequel to a similar symposium entitled The
Present Status of the Quantum Theory of Light held at the same venue in August 1995 These symposia came about as a result
of discussions between Professor Stanley Jeffers and colleagues on the International Organizing Committee Professor Jeffers
was the executive local organizer of the symposia The 1997 symposium attracted over 120 participants representing 26
different countries and academic institutions The broad theme of both symposia was the enigma of modern physics the non
local and possibly superluminal interactions implied by quantum mechanics the structure of fundamental particles including
the photon the reconciliation of quantum mechanics with the theory of relativity and the nature of gravity and inertia Jean
Pierre Vigiér was the guest of honour at both symposia He was a lively contributor to the discussions of the presentations
The presentations were made as 30 minute lectures or during an evening poster session Some participants did not submit a
written account of their presentation at the symposium and not all of the articles submitted for the Proceedings could be
included because of the publisher's page limit The titles and authors of the papers that had to be excluded are listed in an
appendix
