manual for undergraduates an inquiry based approach by Gerczei and Pattison is the first textbook on the market that uses a

highly relevant model antibiotic resistance to teach seminal topics of biochemistry and molecular biology while incorporating

the blossoming field of bioinformatics The novelty of this manual is the incorporation of a student driven real real life

research project into the undergraduate curriculum Since students test their own mutant design even the most experienced

students remain engaged with the process while the less experienced ones get their first taste of biochemistry research

Inclusion of a research project does not entail a limitation this manual includes all classic biochemistry techniques such as
