**When Crime Pays** Milan Vaishnav, 2017-01-01 The first thorough study of the co existence of crime and democratic processes in Indian politics In India the world's largest democracy the symbiotic relationship between crime and politics raises complex questions For instance how can free and fair democratic processes exist alongside rampant criminality Why do political parties recruit candidates with reputations for

wrongdoing Why are one third of state and national legislators elected and often re elected in spite of criminal charges pending against them In this eye opening study political scientist Milan Vaishnav mines a rich array of sources including fieldwork on political campaigns and interviews with candidates party workers and voters large surveys and an original database on politicians backgrounds to offer the first comprehensive study of an issue that has implications for the study of democracy both within and beyond India s borders *Presidents, Populism, and the Crisis of Democracy* William G. Howell, Terry M. Moe, 2020-07-14 To counter the threat America faces two political scientists offer clear constitutional solutions that break sharply with the conventional wisdom Steven Levitsky New York Times bestselling coauthor of *How Democracies Die* Has American democracy s long ambitious run come to an end Possibly yes As William G Howell and Terry M Moe argue in this trenchant new analysis of modern politics the United States faces a historic crisis that threatens our system of self government and if democracy is to be saved the causes of the crisis must be understood and defused The most visible cause is Donald Trump who has used his presidency to attack the nation s institutions and violate its democratic norms Yet Trump is but a symptom of causes that run much deeper social forces like globalization automation and immigration that for decades have generated economic harms and cultural anxieties that our government has been wholly ineffective at addressing Millions of Americans have grown angry and disaffected and populist appeals have found a receptive audience These were the drivers of Trump s dangerous presidency and they re still there for other populists to weaponize What can be done The disruptive forces of modernity cannot be stopped The solution lies instead in having a government that can deal with them which calls for aggressive new policies but also for institutional reforms that enhance its capacity for effective action The path to progress is filled with political obstacles including an increasingly populist anti government Republican Party It is hard to be optimistic But if the challenge is to be met we need reforms of the presidency itself reforms that harness the promise of presidential power for effective government but firmly protect against that power being put to anti democratic ends Investing in wet mills and washed coffee in Ethiopia: Benefits and constraints Tamru, Seneshaw, Minten, Bart, 2018-08-09 Local value addition in developing countries is often aimed at the upgrading of agricultural value chains since it is assumed that doing so will make farmers better off However transmission of the added value through the value chain and constraints to adoption of value adding activities by farmers are not well understood We look at this issue in the case of coffee in Ethiopia the country s most important export product and value addition in the coffee value chain through washing coffee which is done in wet mills Washed coffee is sold internationally with a significant premium compared to natural coffee and we find that this premium is largely transmitted to producers However while wet mills have become more widespread the share of washed coffee in Ethiopia s coffee exports is not increasing over time and even if coffee farmers have access to a wet mill they often do not sell all their coffee cherries to them Relying on a unique primary large scale dataset and a combination of qualitative and quantitative methods we examine the reasons for this puzzle

The reasons seemingly are twofold First labor productivity in producing red cherries which wet mills require is lower than for natural coffee reducing incentives for adoption especially for those farmers with higher opportunity costs of labor Second only impatient often smaller farmers sell red cherries as more patient farmers use the storable dried coffee cherries as a rewarding savings instrument given the negative real deposit rates in formal savings institutions

*Politics and Big Data* Andrea Ceron, Luigi Curini, Stefano Maria Iacus, 2016-12-19 The importance of social media as a way to monitor an electoral campaign is well established Day by day hour by hour evaluation of the evolution of online ideas and opinion allows observers and scholars to monitor trends and momentum in public opinion well before traditional polls However there are difficulties in recording and analyzing often brief unverified comments while the unequal age gender social and racial representation among social media users can produce inaccurate forecasts of final polls Reviewing the different techniques employed using social media to nowcast and forecast elections this book assesses its achievements and limitations while presenting a new technique of sentiment analysis to improve upon them The authors carry out a meta analysis of the existing literature to show the conditions under which social media based electoral forecasts prove most accurate while new case studies from France the United States and Italy demonstrate how much more accurate sentiment analysis can prove

*Environmental and Natural Resource Economics* Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential In a rapidly changing policy and scientific context this new edition of Environmental and Natural Resource Economics reflects an updated perspective on modern environmental topics Now in its fourth edition this book includes new material on climate change the cost competitiveness of renewable energy global environmental trends and sustainable economies The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary Several chapters focus on the core concepts of environmental economics including the theory of externalities the management of public goods the allocation of resources across time environmental valuation and cost benefit analysis Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting Topical chapters focus on energy climate change water resources international trade forests fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students This is the ideal text for classes on environmental natural resource and ecological economics The book's companion website is available at [http://www.bu.edu/eci/education/materials/textbooks/environmental\\_and\\_natural\\_resource\\_economics](http://www.bu.edu/eci/education/materials/textbooks/environmental_and_natural_resource_economics)

*Economic Impacts of Intellectual Property-Conditioned Government Incentives* Dan Prud'homme, Hefa Song, 2016-06-21 This book provides new insights into the economic impacts strategic objectives and legal

structures of an emerging branch of government incentives conditioned on meeting intellectual property related requirements Despite becoming more common in recent years such incentives ranging from patent fee subsidies and patent box tax deductions to inventor remuneration schemes are still under researched A diverse range of analytical methods including econometric analyses case studies and comparative legal analysis are used to study these incentives in countries in Europe and China Scholars policymakers and practitioners can benefit from the conceptual and practical insights as well as policy recommendations provided *Handbook of Service Business* John R. Bryson, Peter W. Daniels, 2015-04-30 Service business accounts for more than 75 per cent of the wealth and employment created in most developed market economies The management and economics of service business is based around selling expertise knowledge and experiences This Handbook co *The Third Pillar* Raghuram Rajan, 2020-02-25 Revised and updated Shortlisted for the Financial Times McKinsey Business Book of the Year Award From one of the most important economic thinkers of our time a brilliant and far seeing analysis of the current populist backlash against globalization Raghuram Rajan distinguished University of Chicago professor former IMF chief economist head of India's central bank and author of the 2010 FT Goldman Sachs Book of the Year *Fault Lines* has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics In *The Third Pillar* he offers up a magnificent big picture framework for understanding how these three forces the state markets and our communities interact why things begin to break down and how we can find our way back to a more secure and stable plane The third pillar of the title is the community we live in Economists all too often understand their field as the relationship between markets and the state and they leave squishy social issues for other people That's not just myopic Rajan argues it's dangerous All economics is actually socioeconomics all markets are embedded in a web of human relations values and norms As he shows throughout history technological phase shifts have ripped the market out of those old webs and led to violent backlashes and to what we now call populism Eventually a new equilibrium is reached but it can be ugly and messy especially if done wrong Right now we're doing it wrong As markets scale up the state scales up with it concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose figuratively and even literally Instead Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest Rajan is not a doctrinaire conservative so his ultimate argument that decision making has to be devolved to the grass roots or our democracy will continue to wither is sure to be provocative But even setting aside its solutions *The Third Pillar* is a masterpiece of explication a book that will be a classic of its kind for its offering of a wise authoritative and humane explanation of the forces that have wrought such a sea change in our lives

**Capacity Mechanisms in the EU Energy Markets** Leigh Hancher, Adrien de Hauteclocque, Kaisa Huhta, Malgorzata Sadowska, 2022-10-13 Capacity remuneration mechanisms or simply capacity mechanisms have become a fact of life in member states energy markets and are one of the

hottest topics in the wider European regulatory debate Concerned about the security of electricity supply national governments are implementing subsidy schemes to encourage investment in conventional power generation capacity alongside already heavily subsidized renewable energy sources With the increasingly connected European electricity markets the introduction of a capacity mechanism in one country not only tends to distort its national market but may also have unforeseeable consequences for neighbouring electricity markets As these mechanisms are adopted by member states with limited supra national coordination as well as consideration for the cross border impact they tend to cause serious market distortions and put the future of the European internal electricity market at risk This second edition will take stock of how capacity mechanisms have actually worked so far and consider the consequences they have for the European internal electricity market It will include a detailed overview of national capacity mechanisms their implications for the EU internal market and will outline the nature of market failures which are likely to occur in the European electricity markets This edition is intended to serve as a point of reference for regulators and policy makers on how to design optimal capacity mechanisms in Europe It will be an invaluable resource for anyone interested in energy market design regulation and competition issues

The Price of Time Edward Chancellor, 2022-08-16 Winner of the 2023 Hayek Book Prize Longlisted for the 2022 Financial Times Business Book of the Year Award A comprehensive and profoundly relevant history of interest from one of the world's leading financial writers The Price of Time explains our current global financial position and how we got here In the beginning was the loan and the loan carried interest For at least five millennia people have been borrowing and lending at interest The practice wasn't always popular in the ancient world usury was generally viewed as exploitative a potential path to debt bondage and slavery Yet as capitalism became established from the late Middle Ages onwards denunciations of interest were tempered because interest was a necessary reward for lenders to part with their capital And interest performs many other vital functions it encourages people to save enables them to place a value on precious assets such as houses and all manner of financial securities and allows us to price risk All economic and financial activities take place across time Interest is often described as the price of money but it is better called the price of time time is scarce time has value interest is the time value of money Over the first two decades of the twenty first century interest rates have sunk lower than ever before Easy money after the global financial crisis in 2007-2008 has produced several ill effects including the appearance of multiple asset price bubbles a reduction in productivity growth discouraging savings and exacerbating inequality and forcing yield starved investors to take on excessive risk The financial world now finds itself caught between a rock and a hard place and Edward Chancellor is here to tell us why In this enriching volume Chancellor explores the history of interest and its essential function in determining how capital is allocated and priced

**Risky business: Uptake and implementation of sustainability standards and certification schemes in the Indonesian palm oil sector** Sophia M Gnych, Godwin Limberg, Gary Paoli, 2015-11-12 Evolving international sustainability norms demand greater environmental

and social responsibility from business across global commodity chains from countries of origin to countries of consumption. Conventional command and control regulation has had limited success in addressing negative environmental and social impacts. As a result, advocacy groups and NGOs have championed a diversity of market based and multi stakeholder governance approaches aimed at shifting the private sector towards delivering more sustainable business models. Multiple non state market driven social and environmental standards have emerged for palm oil. Through interviews with growers and key stakeholders in the Indonesian palm oil industry this occasional paper explores the motivations driving the uptake of sustainability standards as well as the factors supporting and preventing implementation of sustainability standards and asks what model of sustainable oil palm agriculture is ultimately being built. Climate Terror Sanjay Chaturvedi, 2016-01-12. Climate Terror engages with a highly differentiated geographical politics of global warming. It explores how fear inducing climate change discourses could result in new forms of dependencies, domination and militarised climate security. India International Monetary Fund, Asia and Pacific Dept, 2015-03-11. This Selected Issues paper examines how surges in global financial market volatility spill over to emerging market economies (EMs) including India. The results suggest that a surge in global financial market volatility is transmitted very strongly to key macroeconomic and financial variables of EMs and the extent of its pass through increases with the depth of external balance sheet linkages between advanced countries and EMs. The paper also looks at food inflation which has often been singled out as a key driver of India's high and persistent inflation.

*Entry Costs and the Macroeconomy* Germán Gutiérrez, Callum Jones, Mr. Thomas Philippon, 2019-11-01. We combine a structural model with cross sectional micro data to identify the causes and consequences of rising concentration in the US economy. Using asset prices and industry data we estimate realized and anticipated shocks that drive entry and concentration. We validate our approach by showing that the model implied entry shocks correlate with independently constructed measures of entry regulations and MAs. We conclude that entry costs have risen in the US over the past 20 years and have depressed capital and consumption by about seven percent. Experimentalist Governance Bernardo Rango, 2023-08-09. What does non hierarchical governance mean? Under what conditions are actors likely to engage in it? Which trajectory best captures its long term evolution? Through which mechanisms does it overcome gridlock? To respond to these questions at the heart of regulatory governance, Experimentalist Governance develops an analytical framework that draws on contemporary debates but seeks to overcome their limitations. Notably it offers a definition of non hierarchical experimentalist governance that goes beyond institutional structures, focusing attention on actors' choices and strategies. It shows that contrary to expectations, functional and political pressures were more influential than distributions of legal power and bolstered one another. Strong functional demands and political opposition influence actors' capacity of using powers which de jure might be concentrated in their own hands. Indeed, actors can use non hierarchical governance to aid learning and mould political support. Conversely, they may override legal constraints and impose their views on others insofar as they are equipped with

confidence and powerful coalitions beforehand This book also challenges conservative views that non hierarchical governance is doomed to wither away showing that on the contrary it is often resilient Finally it demonstrates that far from being alternatives positive shadow of hierarchy and negative penalty default mechanisms to avoid gridlock are frequently complementary By analysing five crucial domains electricity gas communications finance and pharmaceuticals in the European Union an examination is made of when how and why non hierarchical institutions affect policy processes and outcomes Combining temporal cross sectoral and within case comparisons with process tracing this book ultimately illustrates the conditions trajectories and mechanisms of non hierarchical governance      The Pursuit of Stability of the Euro Area as a Whole Luca Lionello, 2019-10-14 This book analyses the ongoing reform of the European economic union in the light of the new objective of stability of the euro area as a whole in Article 136 3 TFEU On the basis of the relevant legal sources it qualifies this objective as the obligation to preserve the existence of the monetary union the establishment of which was an EU goal laid down in Article 3 4 TEU While to date the objective has been achieved through fiscal and macroeconomic consolidation in the member states and the activation of stabilisation mechanisms in cases of emergency the book argues that full stability requires a better system of economic governance either through a process of partial fiscal centralisation or the return to a more efficient and sustainable market discipline of public finances It also analyses the concrete legal challenges these raise including compliance with the conferral principle the longstanding democratic deficit of the governance and the balance between financial solidarity and fiscal responsibility
