and Dr Suzanne Greenidge Hewitt have created the ultimate pregnancy guide for today's black woman. Most pregnancy books are geared towards white culture in language and approach as well as health issues. While most of the development is the same regardless of race, there are health and cultural issues specific to women of color. But the biggest point of difference is a book written by black women, an educator and a top doctor for black women. *Black Pregnant and Loving It* includes information on the specific health issues common to pregnant black women from hyperventilating to dehydration as well as skin and hair concerns. You'll learn how to select a doctor or midwife, which diet is best for you and your baby, how to identify your body's needs as well as a month-by-month view of what to expect. In addition, there are also flashbacks to older methods of childbirth and black folk myths and superstitions. Overall, this is a complete pregnancy guide rooted in modern science for the health and well-being of the black community. *Obstetrics and Gynecology Review* 1998 H.H. Sheld, 1998-03-15. This is a new and substantially improved edition of Dr Harrison Sheld's popular board-like question and answer review of key articles recently published in the *American Journal of Obstetrics and Gynecology* and *Obstetrics and Gynecology*. The Gray and Green journals now expanded to include Primary Care Update for Ob Gyns and practical solutions of challenging clinical problems from Internet discussions with practitioners from around the world. The book contains 131 questions on gynecology in primary care, general gynecology, reproductive endocrinology, and gynecologic oncology. It contains 153 questions in obstetrics covering general obstetrics and maternal fetal medicine. It uses a convenient side-by-side format in which the question is derived from a recent journal article with a referenced answer next to it, highlighting pertinent basic science or clinical information. This edition also includes for the first time a section of 135 current clinical problems publicized on the Internet with an impressive array of practical solutions from the clinical experiences of practitioners world-wide.

Carbohydrate Metabolism in Pregnancy and the Newborn - IV Hamish W. Sutherland, John M. Stowers, Donald W.M. Pearson, 2012-12-06. Traditions are dangerous, doubly so in science. Traditions are unchanging; science is about change. This was the 4th International Colloquium on Carbohydrate Metabolism in Pregnancy and the Newborn to be held in Aberdeen, and by now the form is set. How much its content has changed is a matter of nice judgement and not under the control of the organizers. It is not within their power to bring news of revolution if there has been no revolution. Certainly many of the speakers had kent faces from previous Aberdeen meetings, but so they would be at any meeting on diabetes anywhere in the world. The written proceedings of scientific conferences have purposes other than to record changes; sometimes they need to state a consensus. The 3rd Colloquium came to an agreement about the importance of prepregnancy recognition and control of abnormalities of carbohydrate metabolism. The 4th set out to examine what results it had achieved. Much of this book is taken up with follow-up studies of the applications of similar regimes in different parts of the world. Since the first Aberdeen meeting in 1973, progress in the management of diabetic pregnancy has been slow and steady, but the change in the city and the society where the meetings took place has been fast. **Operations of Veterans' Administration Hospital and**
