Management in South-East Asia Chris Rowley, Malcolm Warner, 2013-09-13 This edited volume deals with Management in South East Asia. It is widely agreed that this is a region of growing importance economically in today's globalized world. This area contains a diverse range of dynamic economies ranging from the highly developed through to the newly emerging, each competing in a different manner and with different characteristics. This book specifically focuses on current and future developments in areas such as Business Culture, Enterprises and Human Resources. It covers a range of topics, industries, size of firms and countries: Malaysia, Singapore, Thailand, Vietnam, three of which are capitalist economies with the latter a transitional communist one. These locations also comprehend a variety of business cultures with a variety of religious values ranging from Buddhist to Islamic and ethnic identities. The approach taken is interdisciplinary and most of the contributions are by locally based authors who are very well qualified to write about their chosen country setting. The experts contributing include those specialized in banking, business management, economics, finance, sociology, psychology and so on, all based in business schools and universities encompassing a good number of national origins. This book was previously published as a special issue of the Asian Pacific Business Review.

Competency-Based Accounting Education, Training, and Certification Alfred Borgonovo, Brian Friedrich, Michael Wells, 2019-06-06 This guide is designed to assist all those who are responsible for providing or overseeing formal education or practical experience that forms part of the initial professional development of aspiring professional accountants or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for example audit professionals. The purpose of the guide is to increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies, convey the essential features of Competency Based Accounting Education, Training and Certification (CBAETC), provide a common reference framework for organizations pursuing CBAETC and the consultants working with them, assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher order skills relevant to their economy's rapidly evolving needs and improve financial reporting, auditing and regulation. This guide complements and builds on International Education Standards (IES) of the International Accounting Education Standards Board (IAESB).
