Hands-on Ecology Colleen Kessler, 2007 Hands On Ecology develops children's fascination with their world by giving them a front row seat in the exploration of various ecological habitats The book provides teachers with ecology based experiments and activities for the elementary classroom Grades 3-5 **It's Just Good Teaching** Floyd Cogley, Jennifer Kruk-Carcich, 2008-04 This valuable resource book should be on every Pre K through Second Grade teacher's shelf The book is filled with invigorating activities reproducibles and ideas to add to your bag of tricks It is designed by teachers for teachers is in an easy to use format and the perfect size to bring to the copy machine Special Kids for Special Treatment? Helen Phtiaka, 2018-09-03 First published in 1997 This book compares and contrasts the experiences of deviant pupils in a mainstream school with that of those in a special unit for pupils with behavioural problems The author's aims are to i evaluate the differences between the behaviour of deviant boys and girls within the mainstream education system with those without and ii justify the criteria for transferring deviant pupils to special units Her research shows that there is no uniformity in the deviant behaviour of pupils in either situation In fact there are more similarities in the behaviour of pupils across the dividing line than pupils in the same institution Such findings raise questions about the apparent arbitrary nature of some transferral decisions and in the longer term the whole logic of separate schooling for pupils who are considered by some to be a problem At a time when market forces and competition have distracted the schools' attention away from the needs of the individual pupil this book stresses the need for changes at all levels which will make school relevant to the lives of all pupils *One-Sheet-A-Day Math Drills* Neki C. Modi, Alpa A. Shah, 2020-06-23 This One Sheet A Day math drill workbook is for 6th grade students who want extra practice with two number subtraction with decimals up to thousandths It contains 200 math practice sheets one for each school day of the year Upon completion the student will be more competent in 6th grade mathematics and ready to proceed with more difficult exercises Unlike other math drill books this is one of 24 workbooks created to establish a daily routine for each student to practice on their own from grades 1 through 7 It is specifically designed to gradually increase mathematic ability with the least amount of stress for both parent and student Kids need to practice at home to support what they are learning in school but finding resources to help with that goal can be daunting It takes a lot of time searching online for free resources to print or for books with enough exercises Beyond that the options include going to libraries enrolling them in an afterschool class or hiring a personal tutor Who has the time and money for all of that The answer is not many parents Each and every parent wants to provide enough practice work to their kids but on top of the challenges in finding resources questions remain about how much practice a child needs to boost educational success twenty sheets of practice work a day One sheet a week What's the optimum practice work during a whole academic year Confused The authors have a decade of classroom expertise and have spent a large amount of time researching and wasting resources trying all the options for their own kids Now you can benefit from what they have learnt

The result is finding out that ONE SHEET A DAY is the optimum way to support classroom learning and it is amazingly simple This book eliminates the need to take home prints or run around franchises bookstores and libraries trying to find enough material It also prevents you from overwhelming your kids with too many math drill worksheets There are approximately 200 school days a year Simply have your child complete ONE per day Work is far easier when it is part of a routine especially for kids The One Sheet per Day program is an easy routine to start and maintain because it takes less than 20 minutes per day using basic skills your child already knows Simply take one sheet from the book ask your child to complete it in a quiet place and return it to you to check the answers a painless routine for you and your child and instant feedback for both of you Geared to follow most math curriculums most kids can do the appropriate sheet on their own based on what they are learning at school One Sheet A Day math practice drills will give your child practice they need to score higher on test day and build confidence in their math abilities

Social Research Methods by Example Yasemin Besen-Cassino, Dan Cassino, 2023-05-22 *Social Research Methods by Example* sharpens students understanding of the research process and the essential research methods and tools that researchers use to perform their work on the cutting edge of the social sciences The text is broken up into three major sections the first provides a foundation for conducting research and forming a research question executing an ethical approach and drawing upon relevant theories and literature The second provides a fully illustrated overview of different research methods including qualitative and quantitative design constructing and administering surveys and carrying out experiments The authors conclude the text by considering notable current controversies and methodological changes that are impacting the discipline The new edition offers expanded content on key statistical packages for conducting social research and takes readers behind the scenes of writing and presenting a research paper with annotated examples and step by step guidance Far more than an introduction to the principles of social science research this book leaves students with the skills and the applied know how to carry out their own It is an excellent resource for methods courses across the

social sciences **So What Do They Really Know?** Cris Tovani, 2023-10-10 So What Do They Really Know Cris Tovani explores the complex issue of monitoring assessing and grading students thinking and performance with fairness and fidelity Like all teachers Cris struggles to balance her student centered instruction with school system mandates Her recommendations are realistic and practical she understands that what isn't manageable isn't sustainable Cris describes the systems and structure she uses in her own classroom and shows teachers how to use assessments to monitor student growth and provide targeted feedback that enables students to master content goals She also shares ways to bring students into the assessment cycle so they can monitor their own learning maximizing motivation and engagement So What Do They Really Know includes a wealth of information Lessons from Cris's classroom Templates showing how teachers can use the workshop model to assess and differentiate instruction Student work including samples from linguistically diverse learners struggling readers and college bound seniors Anchor charts of student thinking Ideas on how to give feedback Guidelines that explain how conferring is different from monitoring Suggestions for assessing learning and differentiating instruction during conferences Advice for managing ongoing assessment Cris's willingness to share her own struggles continues to be a hallmark of her work Teachers will recognize their own students and the challenges they face as they join Cris on the journey to figure out how to raise student achievement

Differentiating for the Young Child Joan Franklin Smutny, S.E. von Fremd, 2009-10-15 Designed to help teachers meet the diverse needs of young children this book offers differentiated strategies for promoting intellectual discovery and creative thinking across key disciplines Cribsheet Emily Oster, 2019-04-23 From the author of Expecting Better The Family Firm and The Unexpected an economist's guide to the early years of parenting Both refreshing and useful With so many parenting theories driving us all a bit batty this is the type of book that we need to help calm things down LA Times The book is jam-packed with information but it's also a delightful read because Oster is such a good writer NPR With Expecting Better award winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies By digging into the data Oster found that much of the conventional pregnancy wisdom was wrong In Cribsheet she now tackles an even greater challenge decision making in the early years of parenting As any new parent knows there is an abundance of often conflicting advice hurled at you from doctors family friends and strangers on the internet From the earliest days parents get the message that they must make certain choices around feeding sleep and schedule or all will be lost There's a rule or three for everything But the benefits of these choices can be overstated and the trade offs can be profound How do you make your own best decision Armed with the data Oster finds that the conventional wisdom doesn't always hold up She debunks myths around breastfeeding not a panacea sleep training not so bad potty training wait until they're ready or possibly bribe with M Ms language acquisition early talkers aren't necessarily geniuses and many other topics She also shows parents how to think through freighted questions like if and how to go back to work how to think about

toddler discipline and how to have a relationship and parent at the same time Economics is the science of decision making and Cribsheet is a thinking parent's guide to the chaos and frequent misinformation of the early years Emily Oster is a trained expert and mom of two who can empower us to make better less fraught decisions and stay sane in the years before preschool
