

made on each plant worker's earnings per month, the amounts withheld during the preceding month are turned over to the treasurer of the union.

Distribution of Labor Costs

Figure 7.5 shows how the salaries and wages are to be charged to the labor cost accounts.

Start of Payroll Project

October 9, 20--

No. 1 The first payroll in October covered the two workweeks that ended on September 26 and October 3. This payroll transaction has been entered for you in the payroll register, the employees' earnings records, the general journal, and the general ledger. By reviewing the calculations of the wages and deductions in the payroll register and the posting of the information to the employees' earnings records, you can see the procedure to be followed each payday.

Wages and salaries are paid by issuing special payroll checks. When the bank on which they are drawn receives such checks, they will be charged against the payroll cash account.

Observe the following rules in computing earnings each pay period:

1. Do not make any deduction from an employee's earnings if the employee loses less than 15 minutes of time in any day. Time lost that exceeds 15 minutes is rounded to the nearest quarter-hour and deducted. If the time lost by an employee is not to be deducted, the time clerk will make a notation to that effect on the Time Clerk's Report.

Relevance Regained H. Thomas Johnson, 2002-01-15 Building on his pathbreaking award winning bestseller *Relevance Lost* H Thomas Johnson presents a devastating critique of the top down hierarchical accounting systems that have dominated American corporations since the 1950s In *Relevance Regained* Johnson shows exactly how managing by remote control through results oriented accounting information has obstructed the real business objective to reduce process variation and lead times for the purpose of obtaining and keeping satisfied customers The failure of most American businesses to be competitive and profitable he contends is their reliance on management accounting information to control people's actions and productivity Cost focused imperatives from on high must be replaced Johnson asserts with information systems that link actions with imperatives of global competition Self managing work teams according to Johnson must own problem solving information to reduce variation delays and excess in processes Johnson prescribes the necessary changes in management principles that must replace the outdated style associated with the industrial revolution Responsiveness to customers not accounting costs and

flexibility reducing lead times and removing constraints are necessary for sustained competitive excellence and long term profitability Johnson discusses the radical overhauls of companies such as General Electric s work outs best practices program and Harley Davidson s work simplification programs and shows how these strong commitments to new strategies maximize a company s most important assets people and time To be globally competitive he claims a company s work must be directed toward selling to customers not just selling products
