

Performance-Based Development System Testing

The Performance-Based Development System (PBDS) evaluates a nurse's ability to think critically in various clinical situations. More and more of our clients are using the PBDS Test as a way to evaluate clinician competency and to standardize their orientation process. The PBDS test might seem a little intimidating, but **don't stress!** We've put together this study guide to help you prepare.

Training, 2009 *Pediatric Informatics* Christoph Lehmann, George R. Kim, Kevin B. Johnson, 2009-07-16 Now is a critical time in pediatric informatics As information technologies electronic health records EHRs personal health records PHRs computerized physician order entry CPOE and standards HL7 are developed to improve the quality of health care it is imperative for policy makers and pediatricians to be aware of their impact on pediatric care and child health Informed child advocates must be at the planning table as national and regional health information networks are developed to insure the unique health care needs of children are being met Pediatric Informatics Computer Applications in Child Health is a current digest of the important trends in pediatric informatics written by leading experts in the field This book explores how the management of biomedical data information and knowledge can optimize and advance child health The contributors

investigate the specific importance of pediatric informatics is derived from the biological psychological social and cultural needs that distinguish children from other populations. These distinctions create complexities in the management of pediatric data and information that make children a vulnerable population and require the development of a new body of knowledge in pediatric informatics.

Neurovascular Events After Subarachnoid Hemorrhage Javier Fandino, Serge Marbacher, Ali-Reza Fathi, Carl Muroi, Emanuela Keller, 2014-11-03. This book contains articles presented at the 12th International Conference on Cerebral Vasospasm held in Lucerne Switzerland in July 2013. The included papers represent a balanced cross section of the enormous progress achieved in basic and clinical research on aneurysmal subarachnoid hemorrhage and its sequelae including early neurovascular events and delayed cerebral vasospasm. The section on basic research covers a broad range of aspects with a special focus on animal models for the study of acute events after experimental subarachnoid hemorrhage. The section on clinical topics encompasses imaging and endovascular management surgical innovations and techniques management and monitoring in neurocritical care the status of clinical trials and factors involved in aneurysm formation. This edition is of interest not only for basic researchers but also for clinicians who wish to apply state of the art knowledge to the research and management of this devastating condition.
