John Holt Roland Meighan,2014-10-23 John Holt the American educator was passionate about the need for alternatives to traditional institutional schooling seeing schools as often hindering children from learning rather than helping them he became an important proponent of homeschooling or unschooling was a pioneer in youth rights theory and had a profound influence on school reform in particular and educational philosophy in general Here Roland Meighan challenges the often held notion that Holt s work was romantic and impractical within the context of compulsory schooling He brings together the work and thinking of John Holt into applicable theory for education students enabling readers to appreciate the view that individuals outside the education system can influence and change what is happening within it Plato Robin

Barrow,2014-10-23 Plato was the first and most formidable thinker to recognise that education is a fiercely contested concept and to point out what great social and personal issues are at stake in education He articulated a compelling argument for a liberal arts education as something peculiarly befitting free and autonomous beings He understood the centrality of education for human well being and flourishing And he was the first to set forth a systematic theory of education In this text Robin Barrow concisely and convincingly establishes the continuing relevance of Plato s views to debates on such issues as nature vs nurture or genetic inheritance vs social background philosophy vs sophistry or the pursuit of true understanding vs the pursuit of reputation or perhaps simply truth vs politics and the media Questions concerning the fair distribution of education moral education value judgments and human nature are explored along with themes more specifically associated with Plato s philosophy such as the Theory of Ideas The whole is embedded in a clearly presented

account of the historical background to Plato's thought *St Thomas Aquinas* Vivian Boland OP, 2014-10-23 It may be surprising that the thought of a medieval theologian still informs many areas of intellectual debate but there continues to be lively interest in the work of Thomas Aquinas. He considers the most radical questions for our thinking about education: what is a human being? what does it mean to learn? what does it mean to teach? what does it mean to know? to understand and to search for the truth. In this text Vivian Boland offers a short biography of Aquinas focused on his personal experiences as a student and teacher. The book then provides a critical exposition of the texts in which Aquinas develops his views about education and includes a short account of the reception and influence of his thinking. Finally it considers in some detail the most significant points of contact between Aquinas's educational thought and current concerns: his conviction about the goodness of the world, his holistic understanding of human experience and his contributions to virtue theory and highlights the continuing relevance and influence of this work and thinking within educational philosophy today **Aristotle**

Alexander Moseley, 2014-10-23 Aristotle is often underrated in educational circles but the impact of his philosophy and his actions are evident in the schools and universities around us today. Aristotle developed the first proper university that had different departments and vast collections of texts and artefacts. His philosophy has also influenced the greatest minds since his time: from Aquinas to today's logicians, rationalists and empiricists. The influence of his educational thinking and his philosophy in general helped underpin the Renaissance and the modern era. In a nutshell Aristotle took our thinking and said: make it sharper. Alexander Moseley offers a thorough and comprehensive overview of the works of Aristotle and explores the influence of his thought and writings and their impact on our education systems today **Loris Malaguzzi and the Reggio Emilia Experience**

Stefaan E. Cuypers, Christopher Martin, 2014-10-23 What does it mean to say that someone is an educated person? How do we know what's worth including in a school curriculum? Is a good moral education about developing good habits or critical thinking? What role does the development of knowledge and understanding play in living a good life? These are all questions that were robustly taken up by the philosopher of education R. S. Peters. In an era of immense reform and confusion about the values, aims and purposes of education, Peters developed a clear and nuanced account of what education is really about and how educational policy and practice can make good on its

promise This text undertakes a careful and accessible reconstruction of the major themes of Peters thought in order to demonstrate the continuing relevance of his project both for educational researchers and teachers and student teachers seeking to better understand the nature and scope of their work and study **John Locke** Alexander Moseley,2014-10-23

John Locke is one of the great minds in educational history Drawing on his perceptive observations of families and children he saw the importance of adapting learning to the child s dispositions Critical of schools he is the fountainhead of home tutoring child centred learning and the importance of enjoyable learning But for Locke learning was not about facts a good education produced gentlemen who could in turn adapt themselves to commerce and politics Locke s philosophy helped provide rigour to the scientific revolution the impetus for the expansion of schools for the poor which should be profitable and child psychology Alexander Mosely sets Locke s educational writings in their context with a sensitive reading of what Locke understood by education and highlights the relevance of the study of Locke s work to our understanding of education today **Leo Tolstoy** Daniel Moulin,2014-10-23

How do we know what we should teach And how should we go about teaching it These deceptively simple questions about education perplexed Tolstoy Before writing his famous novels War and Peace and Anna Karenina Tolstoy opened an experimental school on his estate to try and answer them His experiences there incited his life long inquiry into the meaning and purpose of religion literature art and life itself In this text Daniel Moulin tells the story of the course of Tolstoy s educational thought and how it relates to Tolstoy s fiction and other writings It begins with his experience of being a child and adolescent incorporates his travels in Europe the experimental school his literature and his views on art philosophy and spirituality Throughout the relevance and impact of Tolstoy s thinking on education are translated into applicable theory for today s education students **Mary Wollstonecraft** Susan

Laird,2014-10-23 Best known as author of A Vindication of the Rights of Woman 1792 if not also as mother of Frankenstein s author Mary Shelley Mary Wollstonecraft survived domestic violence and unusual independent womanhood to write engaging letters fiction history critical reviews handbooks and treatises Her work on coeducational thought was a major early modern influence upon the development of a post Enlightenment tradition and continues to have vital relevance today Celebrated as an early modern feminist abolitionist and socialist philosopher Wollstonecraft had little formal schooling but still worked as a governess school teacher and educational writer This succinct critical account of that prolific research begins by recounting her revolutionary self education Susan Laird explains how Wollstonecraft came to criticize moral flaws in both men s and women s private education based on irrational assumptions about sexual character under the Divine Right of Kings It was to remedy those moral flaws of monarchist education that Wollstonecraft theorized her influential but incomplete concept of publicly financed universal egalitarian coeducation
