Hands-On Science for Manitoba, Grade 7 Jennifer Lawson, 2004 Hands On Science for Manitoba is filled with a year's worth of classroom tested activities. The grade seven book is custom written to the Manitoba science curriculum 2000 and divided into four units: Interactions Within Ecosystems, Particle Theory of Matter, Forces and Structures, Earth's Crust. This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 7 students use and develop, a classroom assessment plan complete with record keeping templates and digital reproducible student materials.

Interactions Within Ecosystems Jennifer Lawson, 2004 The 12 lessons in this module introduce students to ecology through an exploration of ecosystems, succession, biotic and abiotic elements, food pyramids and energy cycles. Students learn to use microscopes to explore organisms. As well, they investigate environmental issues related to ecosystems and the interaction between humans and other living organisms. Also included are materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record keeping templates.

It is aimed at middle ability students but contains enough material for high achievers. Topics are clearly differentiated between core material for GCSE science, Double Award, Single Award, and extension material for GCSE science chemistry.

Key Geography Extensions David Waugh, David Gardner, 1999 Written as a resource for more able pupils, this book offers challenging material that develops the existing series. It is an extension that develops a higher level of skill in both range and depth, links exercises and case studies to Internet sites and ICT activities, encourages the study of themes and places to more depth, has an increased amount of text and uses a higher level geographical vocabulary, offers greater opportunities for individual research, oral work and discussion, and increases the opportunities for the development of values and attitudes.
