- A medical study of heart surgery investigates the effect of a drug called a beta-blocker on the pulse rate of the patient during surgery. The pulse rate will be measured at a specific point during the operation. The investigators will use 20 patients facing heart surgery as subjects. You have a list of these patients, numbered 1 to 20, in alphabetical order.
 - Describe the design of a completely randomized experiment to test the effect of beta-blockers on pulse rate during surgery. Write a few sentences about how you would implement your design.

Label patients in list 01-20. Use the random digit table to select 10 patients & place them in Group 1. The remaining patients will fall into Group 2.

- Use the section from the random digits table below to carry out the randomization required by your design and report the result.
