

What sets off a series of chemical reactions that result in the target cell's response to a message?

- A. The opening of gap junctions.
- B. The binding of the message molecule to the receptor.**
- C. A portion of the cell membrane folding inward and pinching off.
- D. Diffusion of material through the cell wall.

Explanation:

When a message molecule reaches the specific receptor protein it can bind to, it sets off a series of chemical reactions that ultimately lead to the cell responding to the message.
