## **Evidence Multiple Choice questions with complete solutions**

The plaintiff sued the defendant after slipping and falling on the newly waxed floor of the defendant's store.

Under what circumstances is it most likely the defendant may offer evidence that no one has ever been injured before by slipping on the floor?

- A. To show the general absence of negligence on the defendant's
  - B. To show that the defendant was a reputable businessperson
  - C. To show that the defendant lacked knowledge of any danger
  - D. To show that the condition of the floor was not defective
- correct answer: C. To show that the defendant lacked knowledge of any danger;

A has nothing to do with negligence, B is character evidence,

Which of the following is not a requirement of admissible evidence?

- A. It must be probative (contributes to proving or disproving a fact of consequence to determination of action)

**Understanding the Quality Use of Research Evidence in Education** Mark Rickinson, Lucas Walsh, Joanne Gleeson, Blake Cutler, Connie Cirkony, Mandy Salisbury, 2023-12-01 This book focuses on the question of how to understand quality use of research evidence in education or what it means to use research evidence well Internationally there are widespread efforts to increase the use of research evidence within educational policy and practice Such efforts raise important questions about how we understand not just the quality of evidence but also the quality of its use To date there has been wide ranging debate about the former but very little dialogue about the latter Based on a five year study with schools and school systems in Australia this book sheds new light on why clarity about quality of use is critical to educational improvement how quality use of research evidence can be framed in education what using research well involves and looks like in practice what quality research use means for individuals organisations and systems and what aspects of using research well still need to be better understood This book will be an invaluable resource for professionals within and beyond education who want to better understand what using research evidence well means and involves and how it can be supported

**The State of the Art in Student Engagement** Carl Senior, 2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning

involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector

**Assessing Historical Thinking and Understanding** Bruce A. VanSledright,2013-07-31 Assessing Historical Thinking and Understanding advocates for a fundamental change in how educators think about making sense of learners developing cognition and understanding in history Author Bruce VanSledright argues that traditional and typical standardized testing approaches are seldom up to the task of measuring the more complex understandings students are asked to attain as they cannot fully assess what the student knows Rather he points forward along a path toward changes in learning teaching and assessing that closely aligns with the Common Core State Standards He delves into the types of history knowledge the standards require illustrates how they can be applied in use in history learning contexts and theorizes how the standards might fit together cognitively to produce deep historical understandings among students in teaching learning contexts By providing a variety of assessment strategies and items that align with the standards and identifying rich useful assessment rubrics applicable to the different types of assessments he offers an important resource for social studies teachers and curriculum writers alike
